

Kenya Police Air Wing becomes first African customer to operate Eurocopter's enhanced AS350B3e helicopter

Marignane, France, January 12, 2012

The Kenya Police Air-Wing is expanding its airborne law enforcement and crime prevention unit with the delivery of a Eurocopter AS350 B3e Ecureuil helicopter.

Kenya's selection of the AS350 B3e, which is the enhanced version of Eurocopter's successful AS350 model, follows an open and competitive tender won earlier this year by Eurocopter Southern Africa (Pty) Ltd, the Group subsidiary in charge of Southern Africa markets.

The new helicopter, which was handed over to the Kenya Police, in Nairobi will be dedicated to police law enforcement and crime prevention missions including anti-poaching, anti-terrorism operations. It will also be deployed in search & rescue, casualty evacuation, personnel transport and various other civic protection roles.

The Kenya Police Air-Wing is the first African customer for the AS350 B3e, which boasts several enhancements over previous AS350 variants, including an uprated Turbomeca Arriel 2D turbine engine allowing better take-off performances while decreasing maintenance costs.

Range and payload was a primary consideration in selecting the AS350 B3e as the Air-Wing required a helicopter capable of patrolling both the dense built up area around the major cities, Nairobi and Mombasa, but also to cover smaller towns and communities spread over large areas.

Kenya has a land area of 580,000 km² and a population of nearly 39 million residents. It has a diverse geography including a long Indian Ocean coastline. Inland, the terrain varies from savannah grasslands to forests, mountains and even dessert regions. The Police Airwing's choice of Eurocopter AS350 B3e aircraft was based on their superior operational capability and its proven rugged reliability which will enable it to operate in the Kenya's variable conditions which range from equatorial humidity at the coast to hot and dusty in the arid regions.

Over the past decade, the AS350 B3, with its outstanding capabilities, has become the reference helicopter for airborne police units in the Sub-Saharan Africa where law enforcement agencies in Angola, Namibia, Botswana and South Africa have also selected them.

About the AS350 B3e

The powerful, high-performance AS350 B3e is designed to carry out the most demanding missions in the most extreme weather and geographical conditions. Its exceptional lifting capability, high endurance, extended range and fast cruise speed make the AS350 B3e the leader in its class. The popularity of Eurocopter's AS350 in a law enforcement role can be attributed to its ability to meet all of a police flying unit forces' main requirements.

The AS350 B3e is a member of Eurocopter's rugged and proven Ecureuil family. Some 5,000 Ecureuil have been delivered in 98 countries for some 1,600 operators. These aircraft have cumulated more than 21 million hours.

*An AS350 B3 climbed to 3,000m / 9,900ft in 2mins 21sec and made a world record landing on Mount Everest.

About Eurocopter Southern Africa (Pty) Ltd - ESAL

Established in 1994, the 100% owned subsidiary employs 80 people to generate an annual turnover of over 300 mZAR through the sale of the complete range of Eurocopter products and services in Southern Africa. The continuous endeavor to better service its customers, led Eurocopter Southern Africa to move in 2011 to bigger and better premises in Grand Central Airport, ideally positioned midway between Johannesburg and Pretoria in the heart of the economical capital of South Africa. Eurocopter Southern Africa supports key regional customers such as the South African Air Force, the South African Police Services and of course the Kenyan Police but also a large amount of smaller customers spread in more than 20 countries in Africa and Indian Ocean. The motto "we support you where you operate" fully applies to the subsidiary who organizes approximately 100 technical support missions per year in the most remote places to maintain and support a total fleet of approximately 250 helicopters. Able to provide technical as well as pilot training, Eurocopter Southern Africa is currently deploying a full flight Super Puma simulator in Johannesburg to offer basic and advanced simulator training to its African customers base.

About Eurocopter

Established in 1992, the Franco-German-Spanish Eurocopter Group is a division of EADS, a world leader in aerospace, defense and related services. The Eurocopter Group employs approximately 17,500 people. In 2010, Eurocopter confirmed its position as the world's number one helicopter manufacturer in the civil and parapublic market with a turnover of 4.8 billion Euros, orders for 346 new helicopters and a 49 percent market share in the civil and parapublic sectors. Overall, the Group's helicopters account for 33 percent of the total worldwide civil and parapublic fleet. Eurocopter's strong worldwide presence is ensured by its 30 subsidiaries and participations on five continents, along with a dense network of distributors, certified agents and maintenance centers. There are currently 11,200 Eurocopter helicopters in service and some 2,900 customers in 147 countries. Eurocopter offers the largest civil and military helicopter range in the world.
