

OMADA RECEIVES MICROSOFT GOLD CERTIFICATION IN IDENTITY AND ACCESS MANAGEMENT AND APPLICATION DEVELOPMENT

March 27th 2014: Omada is a long-standing, award-winning Microsoft partner, and Omada Identity Suite has consistently supported and been certified to run on the latest Microsoft platforms.

Omada has once again achieved the highest level as Gold Certified Partner for Identity and Access Management and for Application Development Partner competencies. To achieve this level, skills have to be in place through certified personnel as well as product lab certification. To customers, the Gold certification is an assurance of high quality of services and consulting within the field of identity and access management solutions based on Microsoft technology.

The latest release of Omada Identity Suite is certified for running on Windows Server 2012. This means that Omada supports the latest Windows Server and SQL Server platforms, giving customers maximum flexibility when it comes to choice of integration platform to Omada Identity Suite.

About Omada

Omada is a market leading provider of adaptable solutions and services for identity management and access governance. Omada Identity Suite manages IT access privileges of users and IT resources, automating user access requests and provisioning processes as well as reporting on user access and entitlements.

The solution provides a set of pre-packaged workflows and components that are adaptable starting points enabling organizations to focus on the immediate identity related challenges and over time scale the solution according to infrastructure requirements. With a strong focus on IT and business collaboration, the solution delivers quick value, enabling organizations to achieve maximized efficiency, reduced risk, and sustainable compliance - reducing IT costs and resource intensive administration processes.

Established in 2000, Omada has operations in North America and Europe, delivering solutions directly and via a network of skilled partners and system integrators. Omada is recognized as a trusted advisor and has provided advanced solutions for organizations with some of the largest and most complex IT infrastructures in the world.
