## **Mamiya RB/RZ lenses to 645 Adapter**

Many of the excellent high quality Mamiya RB/RZ medium format lenses are owned respectively available worldwide for reasonable prices. Many professional and amateur photographers had/have such systems in use. So, it was obvious, to present a solution for the adaptation of these excellent lenses for the Mamiya 645(D) (and the Pentax 645(D) and Contax 645 AF), and all of the well known 35mm (D)SLR camera systems (digital or analogue). The smaller camera format using the optical sweetspot of the RB/RZ lenses, resulting in best sharpness and contrast, even illumination and the absence of chromatic aberration. Many of the special RB/RZ lenses, like the portrait soft M 150mm, and the 180mm lens, the legendary Apo telephoto lenses, or the outstanding 140mm macro lens, are perfect for the professional use.

The adapter is made with the original Mamiya RB/RZ mounts, the 645 mounts can be rotated (for landscape and portraits etc.) within 90° degree clicks, and is mounted on a massive L-shape trip holder. Thus, even the heaviest RB/RZ lenses can be safely mounted and held firmly. The rugged, milled helicoid tube with 25mm extension, focuses from infinity to close-up (all extension tubes of RB/RZ, 645 or 35mm are usable too!) is extremely stable, made for permanent professional useage, and of silky smooth operation.

Because of the large image circles of the Mamiya 6x7 cm lenses, these are perfectly suitable for the use with shift & tilt adapters. The firm HCam is already in progress preparing such an S&T adapter, which will be made for the professional and permanent operation. For this, we are using all of our know-how of our Hartblei TS lenses, and will built this adapter as a special extension for our RB/RZ adapter, also for 35mm (D)SLR camera bodies. But also in combination with the original Mamiya RZ-TS adapter, and the RZ 75mm and 180mm short barrel lenses, every Mamiya 645 will achieve the shift & tilt movements!

For our market introduction, we will have a special subscription offer:

The first 100 pieces will be sold with an reduced introduction price of 975.00 • net + VAT. The first row will be available exclusively directly from the firm HCam. The official listing price for the adapter will be 1,275.00 • + VAT, and will be made available in professional photo retail stores.

Offers are taken, starting as of today, the adapters will be delivered beginning of September 2011, the subscription needs to be paid upfront to the firm HCam. We will deliver the adapters in the line of orders with serial numbers starting at 00001.

The HCam RB/RZ adapter is an cooperation product between Stefan Steib/Munich ( Sales & Marketing ), and WIESE-Fototechnik/Hamburg (Technics & Production )
