

Lantech LTS-3448

48 10/100/1000T + 4 1G/10G SFP L2 Plus Managed Switch

Advanced L2 + SNMP management functionality

High Density Gigabit & 4-port 10G Uplink Switch for aggregation

Supports IPv4 & IPv6, MSTP , SSH/SSL, TACAS+, ACLs

Support IGMP v3 and Proxy, MVR

IEEE 802.3az for Energy Efficient Ethernet Task Force

Lantech LTS-3448 is a 48-port 10/100/1000T + 4-port 1G/10G SFP L2 Plus Managed Switch which supports full SNMP features, including MSTP redundancy, comprehensive QoS, IGMP v3, IPv6 and enhanced security like ACL, TACAS+ and SSH/SSL.

LTS-3448 supports 4port 10G SFP+ slots where allows more bandwidth and speed when aggregates all Gigabit switches. The advanced security function including SSH/ SSL, RADIUS and TACACS+ authentication, PVE, ACLs as well as supports IP Source Guard to anti-fake DHCP server or illegal IP address to access the network.

With advanced SNMP and security function, LTS-3448 is the best aggregation switch to connect with IP Camera, Setup box, VoIP phone / router, Wireless Equipments for MTU, Transportation or Surveillance applications.
