

## PRESS RELEASE

# IDS Scheer supports Horst Mosolf GmbH & Co. KG with an industry-specific complete solution

- Mosolf improves transparency in its business processes with Industry.PerformanceREADY, the process-oriented solution from IDS Scheer
- End-to-end coverage for the entire process chain
- Solution is based on SAP software combined with industry-specific process scenarios

Darmstadt and Saarbrücken, Germany, July 26, 2010. Horst Mosolf GmbH & Co. KG has selected IDS Scheer, a Software AG Group company, to implement a process-oriented complete solution based on SAP. The goal: to improve transparency and information availability for order processing to better meet customer demands for customized service solutions.

As a leading system provider for logistics services, the Mosolf Group offers a full range of services from a single source and creates custom mobility solutions. The company's objective is to cover the entire operational process chain - including data flow - from vehicle take over through delivery to the recipient. Mosolf's technical and logistics centers including its specialized fleet provide evenly distributed coverage, ensuring the realization of customer-oriented service delivery.

To better meet changing customer needs and guarantee transparency, Mosolf decided to implement a sustainable and scalable technology. By choosing Industry.PerformanceREADY, the company decided to go with a consistent, process-oriented complete solution based on SAP. The package Mosolf selected combines preconfigured SAP software and industry expertise with industry-specific process scenarios. The application fully captures and integrates the Mosolf Group's customer order and logistic processes such as master data management, contract management, order management, dispatching, debit and credit-side settlement as well as controlling.

In addition, LS/ATN - a solution for dynamic optimization and dispatching of Full and Less Than Truck Load operations from Whitestein GmbH - was implemented for transport dispatching to improve resource utilization. Whitestein Technologies is a leading innovator in the areas of software agent technologies and autonomic computing & communications.

"With Industry.PerformanceREADY, the company is receiving a complete solution that combines software and expertise with industry-specific process scenarios based on SAP best practices. This will enable Mosolf to monitor, optimize and manage its key business processes more efficiently", comments Guido Lindlar, Vice President of Consulting Service Industries with IDS Scheer.

###

### About IDS Scheer

IDS Scheer is part of the Software AG Group and a leading provider of business process management (BPM) software, solutions and services for corporations and public organizations worldwide. With the ARIS Platform for Process Excellence, the company offers an integrated, comprehensive solution portfolio for the strategy, design, implementation and controlling of business processes, allowing companies to continuously improve their overall business performance. Utilizing the ARIS Value Engineering (AVE) approach, IDS Scheer consultants bridge the gap between corporate strategy, business processes, IT solutions and process controlling.

### About Software AG

Software AG is the global leader in business process excellence. Our 40 years of innovation include the invention of the first high-performance transactional database, Adabas; the first business process analysis platform, ARIS; and the first [B2B](#) server and [SOA](#)-based integration platform, webMethods.

We are unique in offering the world's only end-to-end - and easiest to use - [business process management \(BPM\)](#) solutions, with the lowest total cost of ownership. Our industry-leading brands, ARIS, webMethods, Adabas, Natural and IDS Scheer Consulting, represent a unique portfolio for: process strategy, design, integration and control; SOA-based integration and data management; process-driven SAP implementation; and strategic process consulting and services.

Software AG had revenues of €847 million in 2009 and has more than 6,000 employees serving 10,000 enterprise and public institution customers across 70 countries. Our comprehensive software and services solutions allow companies to continuously achieve their business results faster. The company is headquartered in Germany and listed on the Frankfurt Stock Exchange (TecDAX, ISIN DE 0003304002 / SOW).
