## PRESS INFORMATION

### TECHART Individualization for the new Porsche Boxster

The TECHART individualization program for the Porsche 981 offers the driver a range of options for making his Boxster into an unmistakable individual piece. There are no limits to the refinement options from the TECHART light alloy and forged wheels, the exclusive exterior and interior styling packages through to the customized and handmade TECHART interior work.

#### **TECHART light alloy and forged wheels**

The original TECHART wheels in 21-inch size lend the Porsche Boxster an even sportier look. Whether in the classically purist five spoke design of the TECHART Formula light alloy wheels or the dynamic double spoke design of the Formula III forged wheels, TECHART convinces in terms of quality and design. A weight reduction of about 40 % regarding to alloy wheels in the same size means lower unsprung masses with the TECHART forged light alloy wheels and gives the Porsche Boxster an optimized agility and handling.

In combination to the TECHART wheel design, the TECHART twin tailpipes made of polished stainless steel in a classic rounded design and the individually colored exterior packages let the car be a unique piece. The TECHART sound muffler or the TECHART sport exhaust system with valve control provide acoustic support that gives the Boxster a strong and sporty sound. The program will be completed in the exterior with the TECHART sport spring kit and a lowering of 30 mm at the front and 20 mm at the rear axle of the car.

### **TECHART interior refinement for the Porsche Boxster**

The TECHART manufacture offers a range of individual options that allow the interior of the Porsche 981 to become a very personal customization. A full leather interior with a decorative stitching in combination with the TECHART styling packages perfectly aligned to the vehicle color set highlights in the interior. Selected carbon fiber packages provide the intentionally sporty, high quality touch. In connection with the ergonomically mounted TECHART paddle shifters, the TECHART 3-spokes sports steering wheels guarantee precision control over the vehicle and allow simple and fast gear changes with maximum driving pleasure.

### **World premiere at the Essen Motor Show 2012 – the TECHART Aerodynamic Kit for the Porsche Boxster**

At this year's Essen Motor Show TECHART celebrates the world premiere of the new aerodynamic kit for the Porsche Boxster. You will find TECHART from the 1<sup>st</sup> to the 12<sup>th</sup> of December 2012 in hall 3 of the Motor Show.
