### EDAC Offers Extensive Sub-D Connector Range

In recent years, EDAC has been continually extending its Sub-D connector range. With the acquisition of the US-Manufacturer Norcomp and the establishment of its wholly owned factory in China as well as the facilities in Canada, USA, UK and Germany, it is now able to offer what is probably the most extensive range of products of this type.

Sub-D's from EDAC are available in almost endless combinations including standard and high density versions, rolled or turned contacts, high current and other combinations and stacking types.

Additionally, the company is extremely flexible and with European and Canadian based development teams can easily provide custom products in medium to large quantities at competitive prices.
