

## **CISEL Selects Ericom AccessNow to Deliver Browser-based Access to SAP Business One in the Cloud**

*HTML5-based Alternative to Classical RDP Empowers Users with Clientless, In-browser Access*

**Closter, N.J. – January 20, 2015** – CISEL Informatique SA, a leading provider of IT services in Western Switzerland, has selected Ericom Software’s AccessNow to provide its customers and internal staff with browser-based access to cloud-hosted SAP Business One and Microsoft Office Suite, from any device, anywhere.

With the rapid growth in the cloud computing market, CISEL sought to make it more convenient for its customers to access SAP Business One. The company switched to using Ericom AccessNow instead of classical RDP, which requires installation and configuration on end user devices. With Ericom AccessNow, users can remotely access their SAP Business One environments and other Windows-based applications or desktops directly from any HTML5-compatible web browser, without installing or configuring anything on the endpoint device – whether it be a PC, Mac, Linux desktop, laptop, Chromebook, tablet, smartphone or even a locked down workstation.

“As a global provider of Cloud services, it is critical for CISEL to empower our customers with convenient access to business data, on whatever computing device they are working, everywhere. Ericom AccessNow is a piece in making that happen, by connecting our customers ubiquitously, clientlessly, simply and cost-effectively,” said Romein van Straaten, Director of Sales, CISEL.

Ericom AccessNow highlights include:

- Runs wholly inside an HTML5-supported browser, such as Chrome, Firefox, Internet Explorer and Safari
- Enables Bring Your Own Device (BYOD) initiatives
- Looks and works the same way on all supported device types, thus reducing training and Help Desk costs
- Does not require any client software deployment, upgrades or patches – lowering the IT staff workload

“We are proud to partner with CISEL to enhance their customers’ SAP Business One experience in the cloud,” said Joshua Behar, President of Ericom Software. “Extending the reach of SAP Business One from the browser, including all dashboards, customizations and third-party add-ins, contributes to increasing user productivity, efficiency and satisfaction. We are committed to helping all industries achieve this level of freedom and flexibility within their ERP solutions.”

coresystems AG has teamed up with Giritech to distribute Ericom products to partners and customers. David Emmenegger, Head of Partner Channel for coresystems AG, commented “SAP Business One adoption and productivity is greatly facilitated by Ericom AccessNow, enabling CISEL customers and users to access business data everywhere, from anywhere and any device, without having the need of complex installation procedures.”

Moving forward, in response to demand from their customer base, CISEL also plans to use Ericom AccessNow to access the human resources management software Persal.
