FOR IMMEDIATE PUBLICATION

Open Frames in Wide Screen Format Now Available for Integration in Existing Systems

Canvys – Consultation, design, development and implementation of comprehensive visual technology solutions for health care, Original Equipment Manufacturers (OEMs) and digital signage applications

Donaueschingen – 11.25.2009. Canvys – Visual Technology Solutions is now offering 20 and 22 inch open frames in the wide format (16:10). Both 16:10 format displays have WSXGA + resolutions of 16080x1050 (19-inch: 1440x900 / 24-inch: 1920x1200). The displays are characterized by high brightness of 300 nits and contrast values of 1000:1.

The 20 inch display offers a solid viewing angle of 160 degrees. With the 22 inch monitor, the angle is visible from 178 degrees. Consequently, the display is also ideal for use in portrait mode, which is indispensable for some applications.

This unit offers a robust metal chassis for flexible kiosk integration, and wide-screen displays that deliver a high-resolution format. As a global value-added integrator and manufacturer, Canvys focuses both on quality and long-term availability of its components in product development. Our collaborative approach gives customers investment security and the ability for long-term planning.

Canvys has a broad range of customization options. Some of which include; safety glass, touch and protective glass integration. – ideal for displays used in extreme environments. High-quality touch screens are also essential if the application requires ideal light permeability and the highest precision. The following applications represent some of these: automation, industry, gaming, casino, POI, POS, kiosk, and digital signage.

Canvys has succeeded in substantially penetrating the market with its display technologies. The origin is not always apparent in the finished products. That is because Canvys is a solution provider and OEM equipper, which means Canvys offers its clientele individuality: customer-specific fronts, colors, logos, etc.

These products are available right now from Canvys. Canvys' European headquarters located in southern Germany also provides 19 and 24 inch versions upon request.

Technical details and prices can be obtained upon request.

Please contact us for details on possible options:
