

## **Orga Systems awarded "Vendor of the Year"**

*Runners up in two more categories*

---

**Paderborn (Germany), 16 May 2013: Orga Systems, a leading software vendor for real-time charging and billing solutions, with an international customer base in the telecommunications, utilities and automotive markets, was awarded with the Pipeline Innovation Award "Vendor of the Year". An international jury of representatives from network operators, system integrators and analysts awarded the prize on the first day of TeleManagement World in Nice (France). In further categories, Orga Systems was runners-up and made it to the finals.**

### **Recognizing real innovation at work**

The highly coveted Pipeline Award is among those with the highest impact in the telecommunication industry. Above all, it is the top-class jury which makes this award so valuable. In 2013, next to network operators BT and Telus, renowned analysts of Analysys Mason, ICT Intuition, IDC and Infonetics were among the jurors. More than 170 submissions had to be examined and judged.

Orga Systems made it to the finals both in the categories "Innovation in Connectivity" with its product OS.Energy 2.0, and "Innovation in Customer Experience Management" with its Digital Life Concept and was awarded as runners-up in both finals. Most outstanding, however, is the victory in the top category as "Vendor of the Year".

"This year's awards submission illustrated the height of technical innovation. Orga System's submission supports how the industry is moving forward together to address real-world issues and improve the end-customer experience. As Vendor of the Year they are a shining example of real innovation at work", said Scott St. John, Executive Editor at Pipeline.
