Cliff Series 5 XLR Receptacles mean Cost Savings without Sacrificing Quality

The CLIFF® range of professional standard PCB mounting Series 5 XLR receptacles is designed for use in numerous applications including professional and consumer audio, broadcast and industrial uses. These components feature a tough DA6 construction with special low noise spring action wiping contacts for both horizontal or vertical PCB mounting. Gold plated contacts are standard on both the male and the female and versions with chassis grounding are available for EMC and RF protection. The Series 5 XLR's are extremely cost effective and space saving when receptacles are mounted side by side.
