## **Ideal for adverse conditions – the new 6 mm compact lens from SCHNEIDER-KREUZNACH**

**The new Cinegon 2.1/6: The compact, robust solution for 3D measurement and crash tests**

Bad Kreuznach, 04. November 2008. With its new Cinegon 2.1/6 compact lens, Schneider-Kreuznach is expanding its industrial optics product range in time for Vision 2008. The new Cinegon was developed to close the gap between the 4.8 mm and 8 mm focal lengths. With a focal length of 6 mm, it expands the selection of short focal lengths.

This particularly sturdy lens was designed for 2/3 inch CCD cameras. Largely unsusceptible to vibrations and other environmental factors, the Cinegon is ideal for use in crash tests and 3D measurements in industrial environments.

The high-performance lenses in the C-Mount Compact line are especially robust for outstanding performance, even in industrial environments. All lenses come with securely lockable iris and focus settings as well as a 400 to 1000 nm broadband coating as standard features.

For more information on industrial optics, please visit [http://www.schneiderkreuznach.com/industrial\\_optics.htm](http://www.schneiderkreuznach.com/industrial_optics.htm).

Schneider-Kreuznach is presenting all of its new products at Vision 2008 on 4 November in hall 4, booth 4B 61.

Industrial optics business area:

Jos. Schneider Optische Werke GmbH develops, manufactures and distributes optical and precision components and assemblies for Machine Vision and other image processing applications. These premium optics solutions help system integrators and machine builders improve their image processing systems.

**About Schneider Group:**

The Schneider Group specialises in the development and production of high-quality photographic lenses, cinema projection lenses, high-quality lenses for industrial applications and precision mechanics. The group consists of Jos. Schneider Optische Werke, founded in 1913, and its affiliates Pentacon (Dresden, Germany), B+W Filterfabrik (ISCO) (Göttingen, Germany), Praktica (London, UK), Schneider Optics (New York, Los Angeles), Schneider Bando (Seoul) and Schneider Asia Pacific (Hong Kong). The main brand is "Schneider-Kreuznach". The Schneider Group has 650 employees worldwide, with 345 at its German headquarters. The group is the long-time world market leader for high-performance lenses.
