

## 57M SWITCH SERIES WITH LED POWER ILLUMINATION

### 16mm Switch with Illuminated Power-Symbol

ITW's 57M Series of vandal resistant, rugged switches are now available with power-symbol illumination. These switches are made of zinc alloy with a velour chrome finish. They are IP67 rated and have a temperature range of -40°C to +85°C.

With a diameter of only 16mm, various wiring possibilities and the choice of solid state or mechanical switching function, these switches can be used in a multitude of applications.

Standard options are: 6 LED colours (Green, Red, Amber, Blue, White and Yellow), mechanical or solid state switching and solder, PC terminals or flying leads. Customer specific versions are available on request.

Typical applications are security equipment, industrial controls, medical equipment, food processing, transportation and computers.
