

Other key features include:

Feature	Benefits
OpenLink™ open source drivers (Wi-Fi and <i>Bluetooth</i> technologies)	<ul style="list-style-type: none"> • Native Linux connectivity solutions • Simplified re-integration with Linux kernel upgrades • Peer-tested technologies
Predefined, validated hardware interfaces and software functionality	<ul style="list-style-type: none"> • Minimized risk and design trade-off analysis
WPA supplicant, hostapd, BlueZ Stack, Open Obex software profiles	<ul style="list-style-type: none"> • Inclusion of all components required for end-to-end connectivity functionality • First-time availability of soft access point via AM18x Sitara ARM EVM
Integrated system components (all firmware, low-level drivers and applications)	<ul style="list-style-type: none"> • Reduced engineering costs, faster time-to-market
Optimized system-level power consumption and throughput	<ul style="list-style-type: none"> • Lower power, higher throughput in complex system use cases
Robust TI E2E community and third party support	<ul style="list-style-type: none"> • Innovation through collaboration • Faster time-to-market
