## Epicor<sup>®</sup> Reports 2009 First Quarter Results

IRVINE, Calif., May 4, 2009 — Epicor Software Corporation (NASDAQ: EPIC), a leading provider of enterprise business software solutions for the midmarket and divisions of Global 1000 companies, today reported financial results for its first quarter ended March 31, 2009. All results should be considered preliminary pending the Company's filing of its quarterly report on Form 10-Q.

Epicor chairman, president and CEO George Klaus commented, "Epicor posted solid first quarter financial results in the face of a continued challenging economic environment. The bottom line benefited from our proactive efforts to align our costs with our anticipated revenues, resulting in non-GAAP earnings per share coming in at the high end of our previously announced guidance. Total revenues narrowly missed our guidance, coming in approximately 1% below the lower end of our expected range.

"We saw business improve as we progressed through the 2009 first quarter, and we had a relatively strong March," Klaus said. "Seasonality in purchasing decisions generally leads to the first quarter being our weakest in terms of revenues, and this year proved especially challenging, as deteriorating economic conditions led to a very slow January and February. We are continuing to see indications that customers may be more willing to move forward with projects, and we expect to see improvement in our top and bottom line results throughout the year. That said," Klaus continued, "economic uncertainty abounds and we will continue to take what we believe is a prudently cautious approach with our revenue and earnings expectations, while modifying our cost structure appropriately."

**GAAP Results:** GAAP revenue for the 2009 first quarter was \$98.7 million, with a net loss of \$1.6 million, or loss of \$0.03 per diluted share. This compares to 2008 first quarter GAAP revenue of \$102.2 million, and GAAP net loss of \$8.0 million, or loss of \$0.14 per diluted share.

**Non-GAAP Results**<sup>1</sup>: Non-GAAP revenue for the 2009 first quarter was \$99.1 million, which excludes approximately \$0.4 million in deferred revenue fair value adjustments from NSB purchase accounting, with non-GAAP net income of \$4.7 million, or \$0.08 per diluted share. This compares to non-GAAP revenue of \$104.0 million, which excludes approximately \$1.8 million in deferred revenue fair value adjustments from NSB purchase accounting and non-GAAP net income of \$4.1 million, or \$0.07 per diluted share, in the 2008 first quarter.

**2009 First Quarter Revenue by Segment:** 2009 first quarter non-GAAP license revenue was \$13.2 million, compared to non-GAAP license revenue of \$18.6 million in the 2008 first quarter. Non-GAAP consulting revenue was \$31.5 million in the 2009 first quarter, compared to non-GAAP consulting revenue of \$31.6 million in the 2008 first quarter. Non-GAAP maintenance revenue for the 2009 first quarter was \$47.3 million, compared to non-GAAP maintenance revenue of \$47.7 million in the same period in the prior year. GAAP hardware and other revenue for the 2009 first quarter was \$7.2 million, compared to GAAP hardware and other revenue of \$6.2 million in the prior year's first quarter.

**Balance Sheet Summary:** The Company's balance sheet at March 31, 2009, included cash and cash equivalents of \$83.2 million. The balance sheet benefited from free cash flow<sup>2</sup> of \$7.2 million during the 2009 first quarter, which helped support approximately \$8.5 million in pay downs on the Company's credit facility during the quarter. The Company's total debt balance as of March 31, 2009, consists primarily of the \$230 million obligation to holders of the Company's 2.375% senior convertible notes (less the debt discount described below of \$48.1 million) and \$86.5 million of borrowings under the Company's credit facility, currently priced at LIBOR plus 2.25%.

At the end of the 2009 first quarter, net accounts receivable was approximately \$79.1 million. The Company had solid cash collections of \$112.9 million during the 2009 first quarter. Days sales outstanding (DSOs) in the 2009 first quarter were up to 72, compared to 68 in the fourth quarter of 2008. Deferred revenue at the end of the 2009 first quarter was \$89.5 million.

Effective January 1, 2009, the Company adopted FSP APB 14-1, "Accounting for Convertible Debt", and retroactively applied this change to all periods presented herein. This standard requires the Company to change the previous accounting method for its \$230 million convertible notes. Accordingly, the Company recorded a \$61.8 million debt discount as Additional Paid in Capital, as of the notes' issuance date of May 15, 2007. At March 31, 2009, the debt discount was \$48.1 million.

The Company is amortizing the debt discount through the date at which the Company can begin to redeem the notes, which is May 15, 2014. The Company recognized interest

expense of \$3.3 million and \$3.2 million related to the convertible debt for the three months ended March 31, 2009 and 2008, respectively, of which \$1.4 million is cash.

## **Business Outlook:**

Due to the uncertainty and limited visibility in the global economy, IT spending and exchange rate fluctuations, the Company will continue to provide forward looking guidance one quarter at a time.

2009 second quarter total GAAP revenue is expected to be \$100 to \$105 million, with non-GAAP earnings per share for the 2009 second quarter expected to be \$0.08 to \$0.09.

The Company's 2009 second quarter non-GAAP earnings per share guidance excludes current expectations for second quarter amortization of intangible assets of approximately \$8.2 million, second quarter stock-based compensation expense of approximately \$1.9 million and approximately \$2.0 million in non-cash interest expense for the second quarter related to Epicor's adoption of FSP APB 14-1. 2009 second quarter non-GAAP earnings per share expectations assume a weighted average share count of 59.9 million shares.

## Earnings Conference Call

The Company will hold an investor and analyst conference call today at 5:00 p.m. Eastern Time/2:00 p.m. Pacific Time.

When:	Monday, May 4, 2009
Time:	2:00 p.m. PT
Dial in:	+1 (888) 819-8015 or outside the U.S. +1 (913) 312-1229
Conf ID:	Epicor 2009 First Quarter Earnings Call
Webcast:	http://ir.epicor.com

On the call, chairman, president and CEO George Klaus and executive vice president and CFO Michael Pietrini will review 2009 first quarter earnings. Investors and analysts are invited to participate on the call. Please dial in approximately ten minutes prior to start time. A live audio-only webcast of the call will be made available to the public on the Company's Web site at <u>http://ir.epicor.com</u> and will be archived for thirty days following the call on the Company's Web site.

<sup>1</sup>Please see the reconciliations to GAAP measures provided at the end of this press release.

<sup>2</sup>Free cash flow is a non-GAAP measure. The Company calculates free cash flow as adjusted EBITDA, plus stock-based compensation, less capital expenditures, cash paid for income taxes and net interest. Please refer to the table below for a complete reconciliation.

### **About Epicor Software Corporation**

Epicor Software is a global leader delivering business software solutions to the manufacturing, distribution, retail, hospitality and services industries. With 20,000 customers in over 150 countries, Epicor provides integrated enterprise resource planning (ERP), customer relationship management (CRM), supply chain management (SCM) and enterprise retail software solutions that enable companies to drive increased efficiency and improve profitability. Founded in 1984, Epicor celebrates 25 years of technology innovation delivering business solutions that provide the scalability and flexibility businesses need to build competitive advantage. Epicor provides a comprehensive range of services with a single point of accountability that promotes rapid return on investment and low total cost of ownership, whether operating business on a local, regional or global scale. The Company's worldwide headquarters are located in Irvine, California with offices and affiliates around the world. For more information, visit www.epicor.com.

Epicor is a registered trademark of Epicor Software Corporation. Other trademarks referenced are the property of their respective owners. The product and service offerings depicted in this document are produced by Epicor Software Corporation.

#### **Forward-Looking Statements**

This press release contains certain statements which constitute forward-looking statements under the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements regarding expected GAAP and non-GAAP revenues (including growth rates), earnings and earnings per share (including on a non-GAAP basis), non-GAAP free cash flow, the Company's products, market share, business model, cross selling and other potential synergies and the accretive affect of the NSB transaction, sales pipelines and opportunities, target market, customer renewal rates, technology lead, competitive advantage and other statements that are not historical fact. These forward-looking statements are based on currently available competitive, financial and economic data together with management's views and assumptions regarding future events and business performance as of the time the statements are made and are subject to risks and uncertainties. Actual results may differ materially from those expressed or implied in the forward-looking statements.

Such risks and uncertainties include, but are not limited to changes in the demand for enterprise resource planning products, particularly in light of competitive offerings; the timely availability and market acceptance of new products and upgrades, including Epicor 9; the impact of competitive products and pricing; the discovery of undetected software errors; changes in the financial condition of Epicor's major commercial customers and Epicor's future ability to continue to develop and expand its product and service offerings to address emerging business demand and technological trends; Epicor's ability to integrate the NSB acquisition and recognize expected revenue synergies; Epicor's ability to continue to support NSB's customers and add functionality to NSB's products; and other factors discussed in Epicor's annual report on Form 10K for the year ended December 31, 2008. As a result of these factors the business or prospects expected by the Company as part of this announcement may not occur. Epicor undertakes no obligation to revise or update publicly any forward-looking statements.

#### Non-GAAP Financial Measures

This press release contains non-GAAP financial measures. In evaluating the Company's performance, management uses certain non-GAAP financial measures to supplement consolidated financial statements prepared under GAAP.

*Non-GAAP Earnings and Revenue Measure.* The Company uses non-GAAP earnings and revenue measures, adjusted EBITDA and free cash flow in this press release. Management believes these non-GAAP measures help indicate the Company's baseline performance before gains, losses or charges that are considered by management to be outside on-going operating results. Accordingly, management uses these non-GAAP measures to gain a better understanding of the Company's comparative operating performance from period-to-period and as a basis for planning and forecasting future periods.

Management believes these non-GAAP measures, when read in conjunction with the Company's GAAP financials, provides useful information to investors by offering:

- the ability to make more meaningful period-to-period comparisons of the Company's on-going operating results;
- the ability to better identify trends in the Company's underlying business and perform related trend analysis;
- a better understanding of how management plans and measures the Company's underlying business; and,
- an easier way to compare the Company's most recent results of operations against investor and analyst financial models.

The non-GAAP financial measures for 2008 and 2009 used by the Company are defined to include deferred revenues from NSB that are expected to be adjusted to fair value as required by purchase accounting in accordance with GAAP reporting, and to exclude amortization of intangible assets, stock-based compensation expense, amortization of long-term debt discount from the Company's May 2007 convertible note offering, the write-off of in-process research and development, the write off of debt issuance fees, loss on settlement of option contracts to hedge foreign currency risk on the purchase price of NSB and restructuring and other non-recurring expenses. The non-GAAP financial measures for 2009 used by the Company are also defined to reflect income taxes at a 38% tax rate.

Management believes that the expense associated with the amortization of acquisition-related intangible assets is appropriate to be excluded because a significant portion of the purchase price for acquisitions may be allocated to intangible assets that have short lives and exclusion of the amortization expense allows comparisons of operating results that are consistent over time for both the Company's newly acquired and long-held businesses. Management also believes that the exclusion of stock-based compensation allows for more accurate comparisons of our operating results to our peer companies because of varying available valuation methodologies, subjective assumptions and the variety of award types which effect the calculations of stock-based compensation. Management believes it is appropriate to exclude costs associated with the in-process research and development charge, the loss on settlement of option contracts to hedge foreign currency risk on the purchase price of NSB, debt issuance fees and the amortization of long-term debt discount from the Company's May 2007 convertible note offering, as well as restructuring and other charges, which included costs associated with the integration of NSB into Epicor, because these charges are not related to the Company's ongoing business operations and it allows for more accurate comparisons of our operating results to our peer companies. Finally, management believes that using a 38% tax rate is appropriate because it allows comparisons of our operating results that are more consistent with prior periods presented, as well as more accurate comparisons of our operating results to our peer companies.

*General.* These non-GAAP measures have limitations, however, because they do not include all items of income and expense that impact the Company's operations. Management compensates for these limitations by also considering the Company's GAAP results. The non-GAAP financial measures the Company uses are not prepared in accordance with, and should not be considered an alternative to, measurements required by GAAP, such as operating income, net income and income per share, and should not be considered measures of the Company's liquidity. The presentation of this additional information is not meant to be considered in isolation or as a substitute for the most directly comparable GAAP measures. In addition, these non-GAAP financial measures may not be comparable to similar measures reported by other companies.
