Data sheet

HP Retail Case

On the go, secure payments

Turn your HP ElitePad into a powerful POS tool with the
HP Retail Case, designed to help you assist customers out
on the floor, conduct inventory, and mobilize transactions
with a range of payment devices. Create a fixed POS with an
optional dock, or mount it for easy customer self service.[1,2]

Service on the go
Take POS to your customers—the hand strap makes it easier to handle. Carry as a crossbody
with an optional shoulder strap[1] and keep your hands free so you can give your customers your
complete attention.

Pick your payment type
Add your choice of third-party payment devices[1] for capturing all major payment methods
including MSR, EMV and NFC. Cradle areas offer compatibility with a range of vendors. Add an
optional tether cable[1] to connect the case and your device for even more flexibility.

Expand what you can do
Use the mobile solution on the go, or create a traditional fixed POS and connect to your suite of
peripherals with the HP Retail Expansion Dock for ElitePad.[1] For fixed-position activities and
additional port replication, add an optional HP ElitePad Dock.[1]

Functionality without compromise
Access all of your HP ElitePad[1] essentials: cameras, pass-through stereo sound, headphone jack,
and more, with a case designed exclusively for the HP ElitePad.

January 2015
