ThermoMed Austria sets the course for further growth in temperature-controlled logistics

- ***New location in Vienna moved into: optimised and faster processes, investment in the latest A/C technology and high insulation standards***

Weinheim/Vienna, 30 September 2019. In September, the trans-o-flex company ThermoMed Austria (TMA), which specializes in actively temperature-controlled logistics of pharmaceuticals, moved into a new location in Vienna. Thus, the company is setting the course for further growth throughout Austria, above all in the region around the federal capital. Since 30th September, TMA has been organising the collection from and delivery to customers and recipients in the regions of Vienna, Lower Austria and northern and central Burgenland from the new location in the logistics centre Wien-Nord. After the rental agreement for the previous location in Wiener Neudorf, where TMA was active for twelve years, was not extended because the landlord claimed the estate for himself, the company, according to TMA's Managing Director Christian Lienhart, found a "modern logistics property that can be used more efficiently for our services". The new location with its 55 employees has 341 square metres of office, recreation and sanitary facilities, more than 3,000 square metres for the storage and handling of shipments, and an additional 1,300 square metres for the secure parking of vehicles.

The logistics centre Wien-Nord is directly connected to the Vienna Outer Ring expressway S1. "With this move, we have secured a long-term, modern location that will play a central role in our expansion strategy," explains Lienhart. "Our customers will benefit from the fact that we can improve and accelerate processes in the modern warehouse and office space. Last but not least, the reliability of our temperature-controlled logistics in both temperature ranges from 2 to 8 °C and from 15 to 25 °C was further increased by the high insulation standard of the property and by investments in the latest standard of proven cooling and A/C technology". The address of the new TMA location in the logistics centre Wien-Nord is: trans-o-flex ThermoMed Austria GmbH, Hall E, Julius-Raab-Straße 26, A-2203 Großebersdorf.

Caption: The well-insulated new building provides ideal conditions for temperature-controlled logistics of pharmaceuticals. In addition, the new TMA location in the logistics centre Wien-Nord, directly connected to the Vienna Outer Ring expressway S1, has very good transport connections.

About trans-o-flex:

The trans-o-flex Group's core competence focuses on the provision of logistic solutions for the pharmaceutical, cosmetics and consumer electronics industries as well on the transportation of other high-quality, sensitive goods. For the transportation of pharmaceutical products, trans-o-flex has built a nationwide network that includes active temperature control and full documentation. To this end, the company, in its Pharma Logistics business area, has installed transport systems that are suitable for the transportation of pharmaceutical products in the temperature ranges of between 15 and 25 °C and between 2 and 8 °C in compliance with the EU directives for the transportation of pharmaceutical products. In its Technology Logistics business area, trans-o-flex organises transports for customers from other industries, mainly consumer electronics. These customers also benefit from the high standards with respect to safety, hygiene, reliability and transparency which trans-o-flex has established for the pharmaceutical industry. In its Contract Logistics business area, trans-o-flex bundles services from storage and picking & packing up to individual value-added services. At an international level, trans-o-flex focuses on the implementation of logistic concepts via the networks EUROTEMP (temperature-controlled logistics) and EURODIS (in 36 European countries). Both nationally and internationally, trans-o-flex, in contrast to 100-% parcel services or forwarding agencies, delivers both goods in parcels and on pallets and also offers special services, such as the transportation of hazardous goods (without being limited to small quantities), express and time-window deliveries, shipment consolidation as well as direct deliveries. Thus, the company covers the entire logistic chain from procurement and warehousing to distribution and fulfilment. In 2018, annual sales of the trans-o-flex Group, which has a workforce of approximately 2,050 employees, amounted to ca. € 468 million. For more information, go to www.trans-o-flex.com.
