

1st Hydrogen Power System Integration Symposium

1st Hydrogen Power System Integration Symposium – 11 October 2022 – Delft / The Hague, Netherlands

Hydrogen is one of the most important clean energy carriers of the future. Although green hydrogen will not achieve climate neutrality on its own, it is the link in the energy transition for CO₂-neutral mobility, industry and the power sector.

At the 1st Hydrogen Power System Integration Symposium on 11 October in Delft / The Hague, Netherlands, international experts from energy suppliers, gas turbine manufacturers, electrolyzer and fuel cells manufacturers, automotive and industrial companies, research institutions and H₂ solution providers will discuss how the transition to large scale green hydrogen application can succeed. The Symposium will feature more than 15 presentations by invited speakers and cover the special topic of “Electrification of Industry Processes”.

HYDROGEN INTEGRATION SYMPOSIUM AS PART OF THE RENEWABLE ENERGY GRID INTEGRATION WEEK

The Renewable Energy Grid Integration Week comprises three high-quality conferences on grid integration of renewable energies in one week and attracts participants from all over the world.

6th E-Mobility Power System Integration Symposium on 10 Oct 2022:

<https://mobilityintegrationsymposium.org>

1st Hydrogen Power System Integration Symposium on 11 Oct 2022 – NO Call for Papers / Invited Speakers only:

<https://hydrogenintegrationsymposium.org/>

21st Wind & Solar Integration Workshop, 12 – 14 Oct 2022 with special topics Sector Coupling & Storage.

Call for Papers also includes Hydrogen Topics:

<https://windintegrationworkshop.org>

The conference series takes place in a different location each year highlighting that region’s particular grid integration issues in keynotes and presentations throughout the week.

TARGET GROUP

Thus, the conferences are designed to provide a platform for power system operators, transmission and distribution grid operators, wind turbine, gas turbine and solar inverter manufacturers, electrolyzer and fuel cells as well as charging station manufacturers, universities and research institutes, and consulting companies to exchange technical and economic developments.

SYMPOSIUM FORMAT

The presentations of the Hydrogen Integration Symposium on research work, practical experience and ongoing as well as concluded projects will be held by invited speakers.

With several accompanying events such as the networking sessions, study trips and tutorials, the renewable energy conference series provides not only a great learning experience but also the perfect opportunity for energy experts to network with their peers from all around the world.

After release of the agenda, online registration for the events will be available on the respective websites. In order to attend, fee-based registration must be finalized via the event website.

Beginn:

Tuesday, October 11, 2022, 9:00 AM Uhr

Ende:

Tuesday, October 11, 2022, 6:00 PM Uhr

Veranstaltungsort:

Den Haag

Netherlands
