

## **CARLIFT II 3.5 ALU: New Four Post Lift for Loads up to 3.5 t**

### **Aims of the Product Development**

The model name says it all: the main components are made of aluminum instead of the more commonly used steel. Runways, traverses, and posts are aluminum made.

The precision aluminum extruded profile are without welding seams and joined together with bolts only giving the lift a high-quality, impressive look. The lift is suitable for special applications such as used car evaluation, vehicle delivery, or wheel alignment and other common workshop tasks.

### **Product advantages:**

- Advanced corrosion resistance
- Reduced dead weight of the lift is ca. 250 kg in comparison to a comparable steel version, lowering the energy consumption for the electro-hydraulic drive bringing with it advantages for transport and installation
- Reduced drive-on height
- Standard delivery equipped for precision wheel alignment with a lowering device made up of serrated bar and latch

**New and Expanded  
Products, in particular  
Lifts**

*Four Column Lift CARLIFT II 3,5 ALU,  
consisting of bolted aluminum compo-  
nents. Sufficient for loads up to 3.5 t.*

## **MAHA as an important manufacturer: approximately 40% worldwide market share**

When it comes to competency, performance and innovative drive in the production of all kinds of vehicle test stands and other measurement devices as well as complete systems to measure, control and adjust vehicle components, MAHA has been the market leader for many years now (founded in 1969). The production program is rounded out with vehicle lifts in various models. Subsidiaries and dealerships in over 130 countries worldwide is sure proof of successful business activities -not only as manufacturer and supplier, but also as service partner for customers as varied as automotive testing organizations, workshops and manufacturers. To underscore this, MAHA can show a 40% market share worldwide for the named products. Over 1000 employees work for MAHA worldwide.

## **MAHA Scope of Products: One-Stop Shopping**

### **Test Equipment for Cars, Trucks, Motorcycles, Tractors, Forklifts, Airplanes**

e.g. for brakes, performance, shock absorbers, side-slip, various functions, tachometers, tachographs, axle and wheel loads, headlights etc.

**Lifting equipment** in numerous models for all types of vehicles.

**Measurement devices for:** emission, in particular for diesel emission particles, noise level, vehicle air conditioning, deceleration, closing force, brake fluid, axle play .

**For tires:** equipment for mounting and balancing

**Workshop planning, training for service technicians and users.**
