

PRESS RELEASE

MOBILITY PROVIDER ISEC7 IS THE FIRST TO INTEGRATE SECURITY PLATFORM GOOD DYNAMICS™ TO MOBILE SAP ACCESS.

Companies using ISEC7's *Mobility for SAP* solutions can be sure that enterprise data will not be compromised in the event that an employee's mobile device is lost or stolen.

HAMBURG, 26. SEPTEMBER 2012

The leading German mobile business specialist, ISEC7 Group, integrates Good Dynamics™ functionality into its *Mobility for SAP* solutions. ISEC7 is the first mobility provider to offer mobile access to SAP systems with Good Dynamics, the most comprehensive security platform for mobile application development. With iOS integration in the final stages, Android will follow by the end of 2012.

"Good Dynamics is the security standard for mobile applications and we are excited to integrate its features into our offering. With Good Dynamics, we can make use of world-class encryption, authentication, and connectivity technology for our *Mobility for SAP* solutions", says Guido Wilken, ISEC7 Software Development Director.

With Good Dynamics, ISEC7 is incorporating Good Technology's proven capabilities in their renowned mobile solutions, securing applications and data end-to-end. In the event that a device is compromised, lost, or stolen, businesses can simply kill the Good Dynamics-secured application without endangering any data present on an employee's mobile device. ISEC7's clients using *Mobility for SAP* applications can thus be sure that enterprise data will not be compromised.

Mobility for SAP has been internationally recognised for its mobile access to SAP data. It is the leading SAP-certified solution to access and work SAP data from smartphones and tablets. The solution offers flexible customisation whilst remaining easy to implement. Compared to other SAP mobile solutions, *Mobility for SAP* is cost effective, as it requires no further middleware. In addition to *Mobility for SAP*, ISEC7 is also the developer of the multi-award winning all-inclusive MDM solution B*Nator. Among ISEC7's customers are leading companies like ABB, Canadian Rail and Grundfos.

At this year's annual DSAG congress (25. - 27.09.2012 in Bremen), ISEC7 will showcase how its *Mobility for SAP* solutions work with the integrated security platform Good Dynamics™. Journalists are invited for expert discussions with ISEC7 executives at the ISEC7 stand H4.

Mobility provider ISEC7 is the first to integrate security platform Good Dynamics™ to mobile SAP access.

ABOUT ISEC7

ISEC7 Group is a global provider of service and software solutions in the field of mobility. The company was one of the first movers in mobilizing company and business processes. Today, ISEC7 counts several renowned companies as committed customers. The company continually invests in the evaluation and development of new technologies. The ISEC7 solutions, such as B*Nator and *Mobility for SAP* have proven to be groundbreaking in the mobility sector. B*Nator, a comprehensive globally applicable Mobile Device Management solution, has been presented the „Most Innovative Enterprise Application“ by BlackBerry. *Mobility for SAP* allows access to any SAP backend without additional middleware. ISEC7 was founded in Hamburg in 2003. The company operates globally with offices in Germany, USA, Switzerland, Spain and Brazil.

ABOUT GOOD TECHNOLOGY

Good Technology combines award-winning enterprise-grade mobile security and control with an exceptional user experience, allowing enterprise and government employees to connect, communicate, and collaborate on their devices of choice. Recognized by the Software and Information Industry Association (SIIA) as the Best Mobile Operations Management Solution in 2011, Good opens new possibilities for maximizing business and personal productivity by providing secure, easy-to-use, and instant mobile access to data, applications and services on hundreds of mobile devices.
