

Promag W

Full bore electromagnetic flowmeter without inlet/outlet runs

Typical electromagnetic flowmeters requires more spaces for installation points which may challenge to you. At Endress+Hauser, we have developed the world's first electromagnetic flowmeter for unrestricted measurement – Proline Promag W with the 0 x DN full-bore option. It eliminates all your concerns about inlet and outlet runs, turbulent flow profiles or pressure loss due to measuring tube restrictions while delivering best measuring performance.
