

Backgrounder

SVA System Vertrieb Alexander GmbH is one of the leading system integrators in Germany in the fields of DataCenter Infrastructure. The company - founded in 1997 and based in Wiesbaden/Germany - by now has more than 280 employees at 12 branch offices all over Germany.

The corporate objective of SVA is the combination of high quality IT products of different vendors with the project know-how and flexibility of SVA to achieve optimum solutions for our customers. SVA core subjects are not only High Availability Architectures and High Scalability SAN Architectures but also Data Security and Disaster Recovery as well as Virtualization Technologies in the area of servers, desktop and storage. In addition, SVA is offering Consulting, On-Site and Remote Services.

The certified „System Storage Solution Center“ of SVA in Wiesbaden provides SVA experts and customers with a broad range of demo, development and education scenarios, covering up-to-date hardware and software solutions of the major vendors.

SVA has developed an innovative and groundbreaking tool for the administration of SAN storage: Business Volume Qualicision (BVQ), an intelligent solution for optimum storage administration according to business demands.

Furthermore, SVA Integrative Disaster Recovery (IDR) offers a software and analysis solution, which systematically captures and analyses the process complexity in possible disasters and, then, accordingly optimises the disaster recovery process.

With SVA zHosting, the company is also able to offer a unique portfolio of managed services based on IBM System z.

SVA has reached the highest certification level e. g. with the following partners: IBM Germany, HDS, NetApp, VMware, Citrix, Microsoft and Hewlett Packard.
