SECUDE & SID Group (Poland) Partner for SAP® Security and SSO

Luzern, Switzeland - July 8, 2008 – As the Polish market continues to see strong economic growth, businesses turn to long-estaplished ERP solutions such as SAP to manage their enterprise environment. But the increased reliance on such tools brings increased risk and cost to companies who do not implement robust security strategy such as Single Sign-On (SSO) to protect their data and increase end-user efficiency.

SECUDE International AG and the SID Group (Poland) have partnered to address the growing market need in Poland for software solutions for SAP customers that enable efficient and secure business processes such as:

- Secure Single Sign-On (SSO) for SAP and other applications
- Automated vulnerability checks for SAP Netweaver®
- Strong user authentication
- Trusted documents & transaction logs through digital signatures

"SAP experts are hard to find," says Thomas Wendrich, VP Sales Europe, NES of SECUDE, "The SID Group was founded by SAP professionals with the expertise that customers demand. By partnering with a strong team, SECUDE will be able to bring our solutions & consulting to the Polish market with the same top level customer support that people have come to expect from SECUDE."

Wherever there is data, there is a risk of data theft. In the digital age, many companies have more value in intellectual property and data than in physical infrastructure and inventory. SECUDE's solutions offer automated vulnerability testing to determine the extent of any danger in the SAP environment. To address these risks, encryption and digital signature solutions protect data and intellectual property throughout the enterprise.

In addition, companies face increased costs from multiple logins and helpdesk calls to reset lost passwords. SECUDE solutions address this with Single Sign-On products for the SAP environment and beyond for a holistic solution which reduces Total Cost of Ownership (TCO) and provides the IT and security groups with an immediate Return on Investment (ROI).

"Business need to manage their risks," says Jacek Bugajski, "With SECUDE solutions, the SID Group will offer best-in-class protection for businesses and bring value to our customers."
