

## Press Release

# Christian Knoblich new MD of EURODIS

**Weinheim, 1<sup>st</sup> August 2016.** With effect from today, Christian Knoblich (47) leaves the Board of Directors of the trans-o-flex Logistics Group and takes over the management of EURODIS GmbH, the international combi-freight network with operations in 35 European countries. The network's German partner is trans-o-flex. After two years and at her own request, Martina Supper, Eurodis' former Managing Director, returns to Österreichische Post. In connection with Knoblich's new appointment, trans-o-flex has also re-organised the responsibilities within its Board of Directors. Frank Iden, the company's CEO, will take over the responsibility for Sales and Marketing and, in his capacity as member of the Advisory Board, also represent the interests of trans-o-flex vis-à-vis EURODIS GmbH and contribute to the further development of the international combi-freight network. As before Wolfgang Weber will be in charge of Operations and Michael Stadlmann will be responsible for the Finance area.

### **About the trans-o-flex Logistics Group:**

The success of the Europe-wide operating trans-o-flex Logistic Group is based on three pillars, the one-stop-logistics shopping services of which can be perfectly combined with each other: 1. trans-o-flex has developed tailor-made industry solutions that create value-added for both dispatchers and recipients. The focus is on the Healthcare, Beauty and Consumer Electronics industries. This is made possible by a unique full-coverage network for the combined transportation of parcels and pallets (combi-freight) all over Germany that includes numerous express and additional services, such as the transportation of hazardous goods without being limited to small quantities. At the same time trans-o-flex, in its capacity as shareholder and partner of the EURODIS network, provides full-coverage combi-freight services in 35 European countries. 2. For the customers in the Healthcare industry, its core customer segment, trans-o-flex has set up two special networks that stand out as very successful USPs. For example, the trans-o-flex ambient network serves to ensure the GDP-compliant delivery of pharmaceuticals with active temperature control in the range of between 15 and 25°C. In addition to this, the trans-o-flex subsidiary ThermoMed takes over the GDP-compliant transportation of temperature-sensitive goods in the range of between 2 and 8°C. as well as deliveries to patients at home. International shipments with active temperature control are offered via the EUROTEMP network in six European countries. 3. Comprehensive logistic services from storage and picking/packing to value-added services up to customer-specific transport networks are developed and implemented under the umbrella of trans-o-flex Logistik Service. In 2015, annual sales of the trans-o-flex Group, which has a workforce of approximately 1,900 employees, amounted to ca. € 500 million.
