

NY Waterway Collaborates With Technology Innovators for Safer, Smarter Ferry Operations

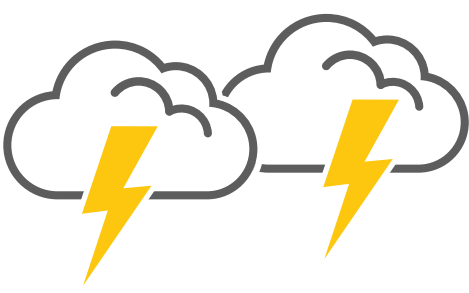

NY Waterway is America's largest privately owned commuter ferry company. Public safety is always a top priority so the ferry operation chose to invest in innovative technologies to improve visibility and response across waterways and terminals.

“We have helped develop a very holistic environment for public safety and preparedness. NY Waterway can more quickly and accurately respond to an event that might be occurring on the water or in a terminal.”

Anil Sookoo, Principal, A.A.S Technologies

CHALLENGES

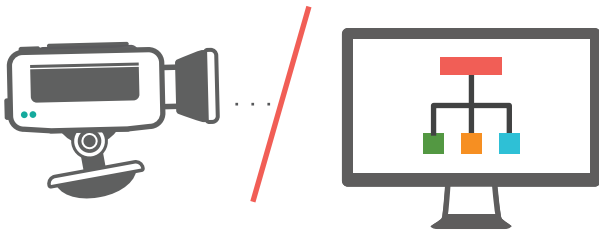

Harsh weather and adverse **conditions**

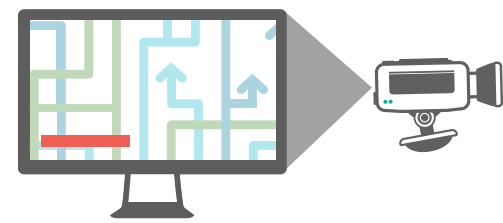

Difficult to maintain onboard camera performance

Localized, disparate video **management systems**

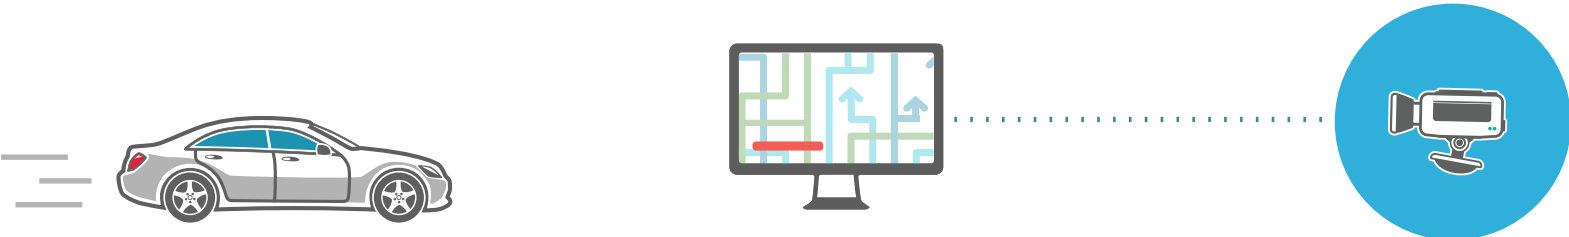

Needed real-time visibility across waterways and terminals

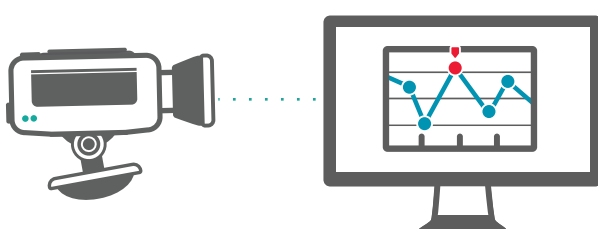

RESULTS

Real-time monitoring and communication across moving vehicles and throughout terminals

Integration of disparate data and video systems

Smarter, safer waterways

Interagency **collaboration capabilities**

Single **dashboard visibility**

SOLUTIONS

Social Innovation: Public Safety

Hitachi Visualization Suite software

Hitachi Visualization Platform gateways

Integration by A.A.S. Technologies
