

MPDV press release

MPDV once again awarded *Top 10 MES Solution Provider*

MPDV USA is still on the road to success

Chicago, February 03, 2020 – For more than 40 years, MPDV has been supporting manufacturing companies on their way to the Smart Factory and setting new standards with its innovative solutions. The American magazine Manufacturing Technology Insights has once again awarded MPDV as the "Top 10 MES Solution Provider - 2019". The experts in production digitization already received this award in 2018. "This is proof of the outstanding quality of our products and services", says Stefan Loelkes, Chief Sales Officer MPDV USA, Chicago.

MPDV's modular Manufacturing Execution System (MES) HYDRA provides a wide range of functions and meets the requirements of the international standard IEC 62264 for manufacturing IT. You can combine the different HYDRA applications based on a central MES database according to your requirements and without interfaces. As a result, HYDRA provides a 360-degree view of all the resources used in production. HYDRA integrates into existing IT landscapes and serves as a link between the shop floor and the management level. Using HYDRA, manufacturing companies remain responsive and safeguard their competitiveness, even with regard to Industry 4.0.

Growth, growth, growth

The family-owned enterprise employs more than 480 people at thirteen locations worldwide in Germany, China, Luxembourg, Malaysia, Switzerland, Singapore and the USA. In 2018, the American MPDV subsidiary, based in Orland Park, IL, celebrated its 10th anniversary as the leading provider of MES solutions in North America. MPDV's customers in the USA include automotive suppliers such as Allgaier, manufacturers of connectivity and sensor solutions like TE Connectivity and gambling machine manufacturers. The MPDV team has already implemented more than 110 HYDRA installations in the USA. Over the past three years, turnover has quadrupled. The increase was achieved by a targeted marketing campaign of the MES HYDRA by the local consulting, implementation and support team.

About MPDV

MPDV headquartered in Mosbach, Germany, is the market leader of IT solutions for the production sector. With more than 40 years of project experience in the production environment, MPDV has extensive expertise and supports companies of all sizes on their way to the Smart Factory. Products such as the Manufacturing Execution System (MES) HYDRA by MPDV or the Manufacturing Integration Platform (MIP) enable production companies to streamline their processes and stay one step ahead of the competition. The systems can be used to record and evaluate production data along the entire value chain in real time. If the production process is delayed, employees can instantly detect the problem and take proactive measures. More than 800,000 people in over 1,250 production companies worldwide use MPDV's innovative software solutions every day. These include renowned companies from all industries. MPDV currently employs about 480 people at 13 sites in Germany, China, Luxembourg, Malaysia, Switzerland, Singapore and the USA. See here for more information www.mpdv.com
