### Joystick in Stainless Steel for Industrial and Medical Applications

The high quality M70000 series joysticks from Engelking are made of stainless steel and are used in such applications as the control of tomography systems. Available in a variety of control options to suit customer needs, for example 4 way with 2 switching positions in each direction, the joysticks are fitted with high grade microswitches with gold plated contacts. The combination of the best materials and "Made in Germany" quality means long life and easy adaption to suit a variety of applications. The threaded spindle can be fitted with standard or custom knobs and special types to suit customer needs are available on request.
