

Mobile key specialist BlueID is a third time Platinum Partner at the symposium "Digitale Gebäude"

Munich, November 2019 – Holistic thinking is becoming increasingly important in the planning, construction, and operation of buildings and is one of the focus areas of the symposium "Digitale Gebäude 2019". For the third time, BlueID is a Platinum Partner at the conference for architects, developers, and designers, which takes place on December 3-4, 2019, at the Park Inn Alexanderplatz Berlin.

"The annual conference specializes in building digitization," says Philipp Spangenberg, CEO of BlueID. "It is an ideal place for us to share our experiences and visions with the expert audience."

In addition to the BlueID exhibition, where high technology solutions about mobile key access control can be experienced, Spangenberg will deliver a speech on Tuesday 3rd December at 10:15 a.m. about "Integrated access control | UX as a guide for digitalization."

"The mobile key access control plays a major roll in the office of the future," explains the expert. The integration of mobile access solutions in buildings, its digitalization and related automation will meet users wishes for flexible office landscapes as well as their expectations for convenient and fast entry. With its broad range of BlueID-enabled lock hardware, BlueID already supports a wide spectrum of use cases in diverse areas.

About BlueID

BlueID GmbH offers a cloud-based platform for the central management of authorisation in the internet of things (IoT). The BlueID ACCESS® solution is an independent, highly secure authorisation management platform that turns your smartphone into a secure digital key and enables mobile authentication, as well as the management of buildings. The BlueID solution is hardware-independent and can be utilised in a variety different IoT environments. For more information, please visit: www.blueid.net
