# Welcome message and accompanying program

**Dear LogiMAT visitors,**

Digitizing and automating intralogistical material flows is a tremendous challenge for many companies. LogiMAT 2026 – the International Trade Show for Intralogistics Solutions and Process Management – offers inspiration, expertise, and concrete solutions to address this challenge. “PASSION FOR DETAILS – Discover the Difference” is the theme that will bring together over 1,600 exhibitors from around the world, filling all ten exhibit halls with their products and solutions. The industry will be represented in all its diversity, from smart software to automated warehouse and transport systems to state-of-the-art powered industrial trucks.

A distinguished program of accompanying events will delve into such trending topics as sustainability, AI, and robotics. With 25 Expert Forums, the Mobile Robotics User Forum, the Smart Maintenance Lounge, various live events, and LogiMAT CareerDay, this year’s show promises to be an inspiring meetup for everyone who wants to play an active role in shaping the intralogistics of tomorrow.

All the information is right here in your hand for easy reference. Our exhibitors look forward to your visit.

**Join us in Stuttgart – and be part of the LogiMAT Community!**

## LogiMAT Arena Atrium | Entrance East

### Official opening of LogiMAT trade show & Best Product Award 2026

**10:00–11:00 AM**

Official opening of LogiMAT trade show by ***Michael Ruchty***, *Exhibition Director, LogiMAT Stuttgart, EUROEXPO Messe- und Kongress-GmbH, München*

Award ceremony with laudation by ***Prof. Dr.-Ing. Johannes Fottner***, *Chair in Materials Handling, Material Flow, Logistics at the Dept. of Mechanical Engineering, Technical University of Munich*

**Be there when the prestigious award „Best Product“ is presented in three categories during the opening ceremony.**

## How much human presence will be needed in the warehouses of tomorrow?

**11:00–11:50 AM**

*Moderation:* ***Dr. Alice Kirchheim****,*
*Institute Director, Fraunhofer Institute for Material Flow and Logistics (IML); Professor, TU Dortmund*

The demand for automation solutions in the logistics industry continues unabated. Many companies are studying options for deploying humanoid robots, even as the industry continues to hire more people. How much human presence will actually be needed in the warehouses of tomorrow?

Fraunhofer IML

## Packaging logistics: implementing the PPWR correctly

**1:00–1:50 PM**

*Moderation:* ***Sandra Lehmann****, Editor,*
*LOGISTIK HEUTE, HUSS-VERLAG*

The Packaging and Packaging Waste Regulation (PPWR) is particularly challenging for the packaging logistics sector, given the rarity of solutions to accommodate high mandatory recycling targets. LOGISTIK HEUTE presents practical approaches for implementing PPWR guidelines.

LOGISTIK HEUTE

## Digitaler Produktpass als Wegbereiter für eine zirkuläre Logistik

**2:00–2:50 PM**

*Moderation:* ***Dr. Johannes Fottner****, Full Professor and Chair of Materials Handling, Material Flow, Logistics (fml) at the Technical University of Munich (TUM)*

The transition to a circular economy requires efficient return logistics for products and materials. How can businesses turn the requirement for a Digital Product Passport into an opportunity to design cost-effective circular processes?

TUM Lehrstuhl fml

## Thinking outside the box: what intralogistics and state-of-the-art facility management have in common

**3:00–3:50 PM**

*Moderation:* ***Jens Reissenweber****,*
*Board Member, FVI*

The digital revolution of automation and data analytics is creating a stronger bond between intralogistics and smart maintenance. This panel discussion examines how this trend can help usher in more efficient processes.

### Digital helpers in the flow of goods – AI as a tool for SMEs
**11:10 AM–12:00 PM**

*Moderation:* ***Anja Glässing****, Project Manager for Digital Transformation and Industry 4.0 Scouting, Allianz Industrie 4.0 Baden-Württemberg*

Three years of AI revolution – time for users and experts alike to take stock: Which applications have made their mark in logistics? What is the state of the art in the industry? And where is there still potential for the future?

ALLIANZ Industrie 4.0 BADEN-WÜRTTEMBERG

### End-to-end operations: What does it take to cut lead times in half at half the cost?
**1:10–2:00 PM**

*Moderation:* ***Dr.-Ing. Roman Ungern-Sternberg****, Head of Operations, Fraunhofer Institute for Manufacturing Engineering and Automation (IPA)*

To stay competitive, specialized manufacturers need to accommodate a high degree of customization in mass production. How can manufacturers identify bottlenecks in complex value streams? What solutions are currently available?

Fraunhofer IPA

### AI-based machine vision sees what moves logistics
**2:10–3:00 PM**

*Moderation:* ***Oliver Scheel****, Business Development Manager, EMVA – European Machine Vision Association*

AI-driven machine vision is transforming the world of logistics! AI + machine vision is revolutionizing processes and boosting efficiency. Learn how innovative technologies are being systematically deployed to shape the future of logistics.

emva european machine vision association

### Preventing freight fraud: microwave scanners for logistics
**3:10–4:00 PM**

*Moderation:* ***Andreas von Lösecke****, Product Manager, Microwave Imaging, Rohde & Schwarz*

Fast, automated protection against freight fraud with the help of non-ionizing millimeter wave scanners. What is already possible today, and what will the future bring?

ROHDE&SCHWARZ Make ideas real

Exhibitors present new products and concepts (Duration: 20 min.)

### Collaborative AGVs for greater efficiency in intralogistics

**10:00–10:50 AM**

*Moderation:* ***Dr. Robert Schulz****,*
*Professor and Director of the Institute of Mechanical Handling and Logistics (IFT), University of Stuttgart*

Collaborative automated guided vehicles (AGVs) pave the way for universal transport solutions. Scalable AGV fleets consisting of freely combinable vehicles result in greater flexibility with less variability in equipment requirements.

IFT

### The brownfield challenge: coaxing a square peg into a round hole

**11:00–11:50 AM**

*Moderation:* ***Dr. Thorsten Schmidt****,*
*Association of German Engineers (VDI),*
*Society for Production and Logistics (GPL),*
*Professor of Technical Logistics at TU Dresden*

Automation is seen as the ultimate solution in the face of cost pressures and the shortage of skilled workers. But how can automation be integrated into systems designed without automation in mind – especially when the business itself is in flux.

VDI

**1:00–1:50 PM**

### Ergonomics – old news or hot topic?

*Moderation:* ***Dr. Veronika Kretschmer****,*
*Senior Scientist, Scientific Board Member,*
*Fraunhofer Institute for Material Flow and Logistics (IML)*

This forum highlights the latest real-world insights: Is ergonomics still just a well-worn theory, or has it long since become an indispensable factor for success in day-to-day operations? Join us for valuable insights that you can apply to your own situation.

Fraunhofer IML

**2:00–2:50 PM**

### Safety vs. low costs in mobile robotics

*Moderation:* ***Dr. Günter Ullrich****, Head of VDI "Mobile Robotics" Technical Committee and Forum-FTS*

Mobile robotics is taking the world by storm. New technologies and applications allow the various continents, with their different safety requirements, to compete with one another. What does this mean for European standardization? Can we afford to maintain the current level of regulation?

### Logistics ChangerS – Finalists' pitches for the LCS Startup Competition

3:00–3:50 PM

*Moderation:* ***Dr. Julia Boppert****,*
*Managing Director, triloglQa | change to lean |*

Innovative startups present solutions for the logistics of tomorrow. How are new technologies transforming transportation and warehousing? What ideas are making supply chains more efficient and sustainable? And what trends will define the industry going forward?

LCS LOGISTICS CHANGERS

### LogiMAT Summit 2026: Top trends in intralogistics

4:00–4:50 PM

*Moderation:* ***Matthias Pieringer****, Editor-in-Chief, LOGISTIK HEUTE, HUSS-VERLAG*

AI, automation, autonomization: What are the trends driving intralogistics, and what opportunities and risks do they present? Top executives and researchers will gather at the LogiMAT Summit 2026 to explore these questions and more.

### How a DC system takes (intra)logistics to the next level

**10:10–11:00 AM**

*Moderation:* ***Kathrin Renner****,*
*Manager of DC Technology, ZVEI (ODCA)*

Direct current systems are the key to a more efficient, sustainable, and secure energy supply. This session examines how DC infrastructures are revolutionizing energy consumption in logistics.

ODCA direct current by zvei

### Procurement made easy: automated supply of goods in manufacturing

**11:10 AM–12:00 PM**

*Moderation:* ***Walter Ahmann****,*
*Senior Consultant for E-Procurement,*
*Process and Integration Manager, simple system*

Where manual workflows slow things down, digital processes create efficiency: Mobile scanning solutions, smart goods dispatching, and a direct line to suppliers ensure availability. A real-world case study from the engineering industry shows how simple system brings this vision to life.

simple system

### Next-generation intralogistics: sensor technology meets AI

**1:10–2:00 PM**

*Moderation:* ***Dirk Schaar****, Managing Editor-in-Chief,*
*GO>>ing INTRALOGISTICS, AMA Digital Networks*

How can data generate added value? This forum shows how sensor technology and AI make intralogistics smart, efficient, and future-proof, with a focus on transparent material flows, prescriptive analytics, and autonomous processes in real-world case studies.

GO>>ing INTRALOGISTICS

### After-sales is not support – it's the most profitable field in engineering

**2:10–3:00 PM**

*Moderation:* ***Thomas Reisacher****,*
*Founder & CEO of FDI Digital Business and Value Hub*

A high-tech warehouse – but with analog sales processes? Many intralogistics experts overlook their greatest potential for profit. How do we make sales visible before the customer starts looking? How do we offer service that generates revenue? And how does that actually play out in the real world?

### Supply chain risk management: resilient supply chains through smart data analytics

**10:00–10:50 AM**

*Moderation:* ***Dr. Michael Krupp****, Professor of Business Administration, Logistics, and Supply Chain Management (SCM), Head of THA_ops Research Group for Optimized Value Chains, Technical University of Applied Sciences Augsburg (THA)*

Technische Hochschule Augsburg

Supply chains are exposed to a wide spectrum of risks. The "Supply Chain Risk Management" Expert Forum highlights real-world strategies to help even SMEs achieve greater resilience. Join the conversation about how smart data analytics can make supply chains more resilient!

### The evolution of the digital twin – from virtual to immersive engineering

**11:00–11:50 AM**

*Moderation:* ***Jan Kaulfuhs-Berger****, Editor-in-Chief, Technische Logistik, HUSS-VERLAG*

Technische Logistik – Hebezeuge Fördermittel

Join us for a discussion of where we stand today and the significance of virtual and immersive engineering in industrial practice: What are digital twins, and where are they used? How visible and relevant is immersive engineering in practice?

### More knowledge. Better planning. Faster implementation. GenAI in supply chain practice

**1:00–1:50 PM**

*Moderation:* ***Dr. Paulina Prantl****, Head of Analytics, Supply Chain Services Division at Fraunhofer IIS*

Fraunhofer IIS

Generative AI opens up new possibilities for automating business processes. But how does this potential manifest itself in intralogistics – and what does its implementation mean in practice?

### Generative AI in logistics projects: tool of choice for project managers and leaders

**2:00–2:50 PM**

*Moderation:* ***Federica Kraft****, Owner and Project Manager, Kraft Intralogistik Solutions*

KRAFT INTRALOGISTIK SOLUTIONS

How can generative AI support logistics beyond just writing emails? Where is the potential for day-to-day project management and leadership? What specific benefits can you expect, and how much will it cost to implement?

# Cargo Securement Event Space

**Hall 9**
**Stand 9B71**

## Secure your cargo – and protect your business

A truck is stopped for inspection – and the cargo is found to be inadequately secured. The shipper? No training, no organizational concept. A fine is issued and a court hearing is set.

We'll present live demos on how cargo securement works – daily at **10:00 AM** and **1:30 PM**.

Also, each day at **12:00 PM**, we'll present an executive workshop on the subject of roles and responsibilities. Our aim is to keep you and your cargo safely on the road and out of the courts!

# Tracking & Tracing Theatre (T&TT)

**Hall 2**
**Stand 2B07**

## AIDC live scenario: automating and digitizing the supply chain

The T&TT presents a live, end-to-end process highlighting the role of AIDC (auto ID, RFID, NFC, barcodes, 2D codes, RTLS, sensor tags, etc.) in digitizing the supply chain for the automation and optimization of business processes.

Daily Demos: **10:30 AM**, **12:30 PM**, **2:30 PM**
(duration: 30 mins)

# Smart Maintenance Lounge

**Hall 4**
**Stand 4H01**

INSTANDX
smart maintenance network

## Smart Maintenance Lounge: experience the future of maintenance – live

The Smart Maintenance Lounge shows how today's tech makes maintenance and intralogistics more robust, efficient, and sustainable, offering managers and executives a one-stop shop for smart maintenance trends and solutions.

Experts will be on hand at Demo Points for consultation and to present such cutting-edge technologies as autonomous inspection robots, XR tools for remote maintenance, state-of-the-art replacement part and sensor systems, predictive maintenance software, and digital twins.

# The exhibition areas

| | |
|---|---|
| | Materials handling and storage technology, Warehousing and operational equipment, System provider, Hall and marquee construction |
| | Handling, Cranes, Fire protection and security, Loading technologies and Door systems |
| | Load security |
| | Ground conveyors, Batteries, Battery management, Ancillary epuipment for stackers, Cleaning |

# in the halls

| | |
|---|---|
| | Storage and Transport management software, Simulation, Order-Picking systems, Fleet management |
| | Automated Guided Vehicles, Robotics |
| | Packaging, Packaging materials and machinery |
| | Labeling and printing, Identification – RFID/AUTO-ID |
| | Intelligent Pack & Store solutions |

## Dates and times

**March 24–26, 2026** (Tuesday to Thursday)
9 AM to 5 PM

## Location

Messe Stuttgart, Flughafenstraße, 70629 Stuttgart

## Ticket prices for pre-registered industry professionals

| | |
|---|---|
| **Day pass** | € 34 |
| **Event pass** | € 70 |

## Special offers from our premium partners – exclusively for you

Book your stay during the event free of charge at our partner hotels and plan your trip with our special fares with the Lufthansa Group and for rail travel with Deutsche Bahn.

In cooperation with

DB · Austrian · Lufthansa · SWISS · brussels airlines · Eurowings

## Extra parking and shuttle service

Coming by car? Simplify your parking experience and take advantage of our **stress-free option**: In addition to the on-site parking at Messe Stuttgart, we're offering **convenient overflow parking at the SI Centrum** (Plieninger Str. 109, 70567 Stuttgart-Möhringen).

**Parkhaus P2** at the SI Centrum has **over 2,000 parking spaces** available (€2.50/hour, day rate €16). From there, a **free shuttle service** brings visitors **directly to the West Entrance** of Messe Stuttgart on all three days of LogiMAT, **8 AM to 7 PM**. The shuttle departs on demand, going from the **SI Centrum bus loop** to the **West Entrance of Messe Stuttgart** and back.

**Public transportation** is also available between the SI Centrum and Messe Stuttgart.
