## Loudness Films reduces noise and increases efficiency in editing suites with the Draco tera compact KVM matrix switch

Oberteuringen, August 26, 2015 – Loudness Films provides a complete post-production service for TV and Film, supporting all aspects of sound design and editing, picture editing and composition, VFX, color grading, recording and mixing, Foley and ADR.

Limited studio space and the desire for a noise-free environment means that only essential equipment should be included. Several people will often work together in the confined area, each requiring access to specific tools. Loudness' solution to these perennial problems was to deploy a small Draco tera compact KVM matrix switch from IHSE to enable operators to access computers housed tens of meters away in a central server room. Using simple keystrokes, each workstation can be instantly connected to any source device.

"Working on the sound for a film, a sound engineer can operate the main mixing desk whilst viewing audio monitoring setup on a monitor, or can access the Pro-Tools systems or Dolby RMU settings using the same monitor," explains Branko Neskov, founder of Loudness Films. "This reduces the number of screens in the dubbing theatre: information is displayed as required rather than always displayed. Individuals can select what they want to see in front of them, rather than interrupt a colleague or to moving to see a different screen, which is not something that is easily done in a confined studio."

The full range of IHSE KVM products will be available for demonstration at IBC in Amsterdam, September 11-15, 2015. Booth 7.B30.

**About IHSE**

IHSE is a leading developer and manufacturer of advanced Keyboard, Video, Mouse (KVM) devices with 30 years of experience. KVM technology enables the remote switching, bidirectional extension and conversion of primary computer signals including DVI, HDMI, 4K DisplayPort, digital audio and USB. IHSE develops and manufactures an extensive range of KVM switches and extenders with visually lossless signal transmission from headquarters near Lake Constance, Germany.

IHSE products have been certified for outstanding manufacturing quality, operability, resilience and high transfer speeds. Many renowned companies and institutions across vertical sectors including Broadcast, Post Production, Control Rooms, Banking, Industrial, Healthcare, Maritime, Education, Venues, Air Traffic Control and Government rely on KVM solutions made by IHSE, Germany.
