

The miniaturization of infrared detectors

Lead Selenide Detectors in a TO-46 Housing

Effective immediately, LASER COMPONENTS offers a PbSe detector in a 4.7 mm TO-46 housing. Up to now, the smallest available size was an 8.3 mm housing. This new component has a 1 mm detector and is available under the designation PB45S10104S. Prototypes are already available in stock for delivery.

Trade Shows

BiOS 2016, Feb. 13-14, 2016, Moscone Center, San Francisco, USA, **Booth 8939**
Photonics West 2016, Feb. 16 - 18, Moscone Center, San Francisco, USA, **Booth 2023**
DCS 2016, Apr. 19 - 21, 2016, Baltimore Convention Center, USA, **Booth 542**
Control, Apr. 26 - 29, 2016, Messe Stuttgart, Germany **Hall 1, Booth 1635**
analytica, May, 10-13, 2016, Messe München, Germany **Booth A2.500**
Sensor + Test, 10. - 12. Mai 2016, Messe Nürnberg, Germany, **Hall 1, Booth 256**

The Company

LASER COMPONENTS specializes in the development, manufacture, and sale of components and services in the laser and optoelectronics industry. At LASER COMPONENTS, we have been serving customers since 1982 with sales branches in five different countries. We have been producing in house since 1986 with production facilities in Germany, Canada, and the United States. In-house production makes up approximately half of our sales revenue. A family-run business, we have more than 200 employees worldwide.
