VARTA Microbattery at WT Show of MEDICA 2013 in Düsseldorf, Germany

Ellwangen, November 20th of 2013

VARTA Microbattery will present rechargeable and primary batteries for the most demanding requirements at the Wearable Technologies Show of MEDICA 2013 from November 20th till November 23rd in hall 15, booth C05 in Düsseldorf. The product portfolio includes special power pack solutions which can be inserted into medical products.

The MEDICA exhibition is known as the world's biggest event for the medical sector. The WT Show presents the latest technologies from the Wearable Technologies field. VARTA Microbattery will use this platform to present attractive battery solutions which can also be used in portable medical devices such as insulin pumps or mobile patient monitoring.

Due to the aging society of the western world, portable medical devices become necessary to secure the infrastructure of elder people's social lives. Mobile equipment allows those people concerned to continue to participate actively in social life. The technology leader VARTA Microbattery will present battery solutions which are needed to ensure the reliability of portable technologies in the medical field. VARTA Microbattery will show H₂-Gas Generating Cells, reliable Silver Oxide Button Cells and new Nickel-Zinc Button Cells. The ZR Button Cells Nickel-Zinc are the ideal addition and a cost-challenging alternative to Silver Oxide technology. Moreover, the leading battery manufacturer will show the award winning VARTA Coin Power Lithium-Ion cells in the exhibition which are an ideal battery solution for medical applications such as insulin pumps.

The VARTA Microbattery team is looking forward to your visit in hall 15, booth C05 .
