FURTHER OPTIONS AND IP67 FOR CSI003 AND CSI004

Maintained version available / screw terminals for momentary and maintained

The CSI003 and CSI004 pushbutton series from Engelking Elektronik GmbH are known for the big range of applications. Signal operation, door bells, medical equipment and switch panels are only a few examples. The attractive design fits into a 19mm hole so they can be used in any application.

The new options include screw terminals for a faster and easier mounting. IP67 for the momentary versions and additionally a maintained version (IP65). These options are also available for the non illuminated versions (CS003).

The range of applications for these switches has become even greater by adding screw terminals as an option and also the IP67 rating.
