READY!

Get all data,
positions & routes
for entire fleets

One solution

Build your fleet management solution with the autoaid Connected Car System. Use the API to integrate all data for entire multi-brand fleets.

Exclusive data

autoaid gives you access to OEM-specific data such as fuel level, mileage, or service intervals. All data is read out directly from the ECUs to guarantee the highest accuracy.

High efficiency

Increase the efficiency and utilization of fleets by taking full advantage of connected car data.

Optimize fuel consumption, servicing, and vehicle dispatch.

Low costs

autoaid offers flexible pricing models for small, medium, and large businesses. Subscribe only to the data sets that you need for your individual use case.
