## MPDV awarded as Top 10 MES Solution Provider

The distinction is a proof of the high product quality

**Chicago, February 11, 2019 – MPDV is honored to have been selected as one of the “Top 10 MES Solution Providers – 2018” by the American magazine Manufacturing Technology Insights.**

Efficiency and quality standards are the classical topics that dominate the manufacturing industry. MPDV, a family owned business headquartered in Germany, is helping manufacturing companies to digitalize their manufacturing processes and to modernize their shop floor environment. Recently MPDV has been recognized as one of the “Top 10 MES Solution Providers – 2018” by Manufacturing Technology Insights. The award is a proof of the high product quality of MPDV’s Manufacturing Execution System (MES) HYDRA.

“We are proud to receive this award. It is a tribute to what we’ve done in the last 40 years in the manufacturing area”, says Stefan Loelkes, Chief Sales Officer at MPDV USA in Chicago.

HYDRA the modular structured MES by MPDV, features an extensive functional range and meets all requirements stated in the ISA95 and the VDI guideline 5600. Individual HYDRA applications based on a central MES database can be combined without the use of interfaces. Thus, HYDRA guarantees a 360-degree view on all resources in production and can incorporate overlapping processes. Powerful tools for configuration and customization ensure that HYDRA can be modified in order to cater for company and industry specific requirements. HYDRA can be integrated into existing IT landscapes and is used as a link between production (shop floor) and the management level (e. g. ERP system). Production companies that use an MES system like HYDRA become reactive and therefore remain competitive – especially looking at Industry 4.0.

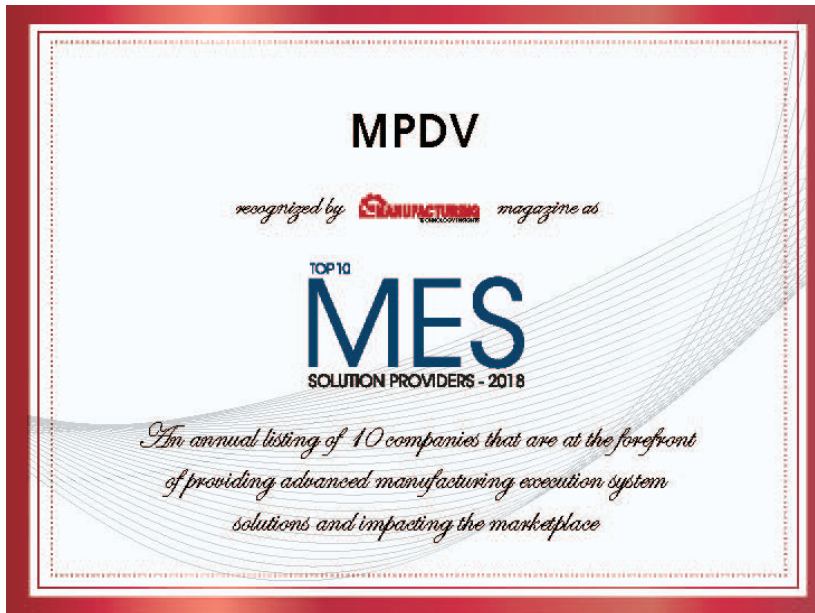

### **Growth, growth, growth**

For many years MPDV has been driving forward its steady double-digit growth. Worldwide more than 420 employees work at eleven locations in Germany, China, Malaysia, Switzerland, Singapore and the USA. Last year, the group's turnover was 60 million euros. More than 800,000 people use MPDV's software solutions every day, making their production fit for the future.

In 2018 the American MPDV subsidiary in Orland Park, IL, celebrated its 10th anniversary as the leading provider of MES solutions in North America. MPDV USA started in 2008 as a One-Man-Show in Chicago. Today the subsidiary has more than 20 employees and continues to grow. This growth is based on the targeted marketing of the MES HYDRA solution by the local sales and marketing team. An extensive local and competent consulting, implementation and support team ensures the long-term success of HYDRA in the market. The MES HYDRA is by now used in over 75 production places in North America.

## About MPDV

MPDV, headquartered in Mosbach Germany, is the market leader for IT solutions in the manufacturing sector. With more than 40 years of project experience in the manufacturing environment, MPDV has extensive expertise and supports companies of all sizes on their way to the Smart Factory. Products such as MPDV's Manufacturing Execution System (MES) HYDRA or the Manufacturing Integration Platform (MIP) enable manufacturing companies to streamline their production processes and stay one step ahead of the competition. The systems can be used to collect and evaluate production-related data along the entire value chain in real time. If the production process is delayed, employees detect it immediately and can initiate targeted measures. More than 800,000 people in over 1,250 manufacturing companies worldwide use MPDV's innovative software solutions every day. This includes well-known companies from all sectors. MPDV employs around 420 people at eleven locations in Germany, Switzerland, Singapore, Malaysia, China and the USA. Further information: [www.mpdv.com](http://www.mpdv.com).
