## **Real-time based solutions enable profitable future growth**

*Leading the transformation – Orga Systems live at the Mobile World Congress 2011*

---

**Paderborn (Germany) 01 February 2011: The mobile industry and a growing number of related market sectors joining the mobile ecosystem are experiencing challenging times. There is the growing demand for next generation services on the one hand and rising costs for network infrastructure and equipment on the other. At the Mobile World Congress 2011, Orga Systems, #1 choice for real-time charging and billing, will showcase its solutions, enabling profitable future business.**

### **Customer centricity and customer focus**

Real-time convergent billing systems are meeting the needs for reduced OPEX and CAPEX, true customer-centricity, fast time-to-market, high scalability and outstanding performance, as well as state-of-the-art financial management capabilities. Policy solutions are enabling dynamic Bandwidth Management and future-proof bill shock prevention to meet both network resources and customers demands at the same time while providing excellent customer focus.

### **Real-time solutions for new revenue channels and long-term growth**

Mobile money services are providing immediate access to many new profitable revenue streams and ensuring profitable business for operators as well as all kinds of mobile money issuers. Out of the shelf real-time pre-paid billing systems are ready for operation within a few weeks, capable to launch new pre-paid offerings quickly while at the same time being scalable to ensure sustainable long-term growth.

Orga Systems' real-time based suite of world-class solutions will be presented at the GSMA Mobile World Congress 2011. Experience Orga Systems' offerings in action - at booth 8B130 in Hall 8 from 14-17 February 2011.
