STW AND MTCOIN TO BUNDLE PRESS-FIT TECHNOLOGY EXPERTISE

Kaufbeuren, 22 January 2020 – Sensor-Technik Wiedemann GmbH (STW) enters into another cooperation: At the end of 2019, the company procured shares in the power element experts MTCOIN power2pcb (MTCOIN). By combining their core competencies, the two companies intend to develop, produce and market high-performance PCB components and assemblies even faster, more efficiently and more inexpensively.

In addition to its tried and tested portfolio of MTCOIN power elements and connectors, MTCOIN is incorporating into the cooperation its long-standing experience in press-fit technology, plastic injection molding and connection technology as well as in the design and development of high-performance connectors and PCBs. STW is able to boast a decades-long success story in the manufacture and development of electronic assemblies for mobile machines. MTCOIN is to integrate the entire family of STW connectors into its portfolio, and will sell them all over the world to international clients in these markets.

“We have already collaborated successfully with MTCOIN for several years now”, says Wolfgang Dengler, COO at STW GmbH. “We utilize MTCOIN products and solutions in order to support our customers in the development and manufacture of mobile machines with innovative solutions in the fields of digitalization, automation and electrification. Through our cooperation, we are now intensifying our collaboration so that we – as one of the world’s largest providers of electronic assemblies for mobile machines – can implement the high-standard electronics requirements of our clients even more efficiently, powerfully and sustainably.”

Press Release

"STW's cooperation in MTCO is for us a wonderful recognition of our company's performance and products", says Mario Tolj, Managing Director of MTCO. "We are looking forward to expanding our international product portfolio yet again with STW's entire connector family. In addition to our powerful relays, fuse bases and connectors in press-fit technology, our customers can now also obtain innovative board-to-wire connectors and 2nd-generation products."

About MTCO

The MTCO power2pcb GmbH (mtcon.eu) provides innovative PCB technology and expertise in the three business fields Power Elements, Connectors and Knowhow Transfer for automotive, industrial off-road vehicle and numerous other industrial high-tech applications. This rapidly-expanding technological company leads the way in the area of power element press-fit technology, and holds numerous patents as well as flavor, application and design protective rights.
