

Press release

Battery operated marking system now available in new version

FlyMarker® mini 120/45 with adjustable and removable aluminum positioning plate guarantees optimal positioning and precise marking results

MARKATOR® is constantly working to optimize its marking systems and to meet the marking requirements of its customers. The focus is on achieving a continuous simplification in permanent marking of different kind of workpieces and materials. As a result, new accessories and variants are constantly being created, tailored to a wide range of possible applications.

The latest development is the new version of the battery-operated hand-held marking system FlyMarker® mini 120/45 with adjustable and removable aluminum positioning plate. This positioning plate makes it easy and flexible to adapt the FlyMarker® mini 120/45 to customer-specific requirements and devices. In addition, the stable design of the aluminum positioning plate ensures optimal positioning and precise marking results. The adjustable aluminum positioning plate also offers the known large marking field of 120 x 45mm and guarantees a consistent marking quality across the entire marking field.

Equipped with all the general functions of the FlyMarker® mini 120/45 basic unit, the FlyMarker® mini 120/45 portable marking system with adjustable and removable aluminum positioning plate becomes a professional partner for permanent and tamper-proof markings.
