
SECUDE Global Consulting Signed Partnership Agreement with Dr. Ghassan Al Abdollah as Partner and Managing Director of SECUDE Middle East FZ-LLC

Dubai, United Arab Emirates – 10 February 2009 – SECUDE expands its SAP expertise with the addition of Dr. Ghassan Al Abdollah as Partner and Managing Director of SECUDE Middle East FZ-LLC. With a PhD degree in Management and Business Systems from Boston University and 30 years experience in IT and Business Management, Dr. Al Abdollah raises the level of IT security expertise for SECUDE.

“Dr. Ghassan brings a systematic and consistent approach to develop the Enterprise Risk Management (ERM) market and expand our Mid-East distribution system,” says Heiner Kromer, Chairman of SECUDE AG, “His addition to SECUDE will benefit our customers by bringing the best services and solutions from a known professional.”

“I am impressed by the way SECUDE achieves between its consulting and products groups to achieve a higher level of solutions and services for their customers,” says Dr. Ghassan, “Their technological and strategic growth over the past two years is remarkable and I am looking forward to helping them grow even further. Enterprise Risk Management (ERM) demands expert consulting and solution providers and our customers recognize that SECUDE delivers.”

Dr. Ghassan Al Abdollah joins SECUDE after 10 years of experience as Business Development Manager for SAP Arabia. He was deeply involved with SAP R/3 implementations for companies like ARAMCO, SABIC, Qatar Gas, Saudi Cable, and others. His Jordanian based company APCA (FMS) delivered security solutions to the government, banks, industrial companies and others. He has built up partnership agreements with international companies like Miditech Security Systems (Germany) & Access Control, Iconics (USA), SCADA Systems, and QMS (Malaysia) Queuing Management System. Dr. Abdollah is also known for his global leadership and marketing seminars as well as his work as an international consultant for enterprises around the world.

“SECUDE is one of the best leaders in the IT security technology worldwide and has proven success stories with many global enterprises,” says Dr. Ghassan. “SECUDE has pioneered technology in the IT security market with the most sophisticated Enterprise Risk Management (ERM) solution. This

Press Release

puts SECUDE in a great position in the IT security/consulting world, offering great added value products and services to clients and customers.”

About SECUDE Global Consulting

SECUDE Global Consulting was founded in 2006 to address a rapidly growing need in risk management consulting services. The company offers consulting services around its core competences: security and access rights, Governance, Risk & Compliance (GRC), Identity & Access Management, security of infrastructure and architecture, and data protection and strategies for a comprehensive risk management.

Based on a holistic approach and a team of international experts, the consulting company helps enterprise customers to adhere to statutory provisions and achieve a higher security level for their business operations, SAP/ERP applications, and IT systems. SECUDE Global Consulting developed a rigorous methodology to achieve long term, sustainable Enterprise Risk Management (ERM) solutions with dedicated Quality Assurance practices.
