

Med-Trans Corporation Orders 16 EC135s to Support Expanding Business Model

Berlin, September 13, 2012

Today, at an event during the ILA Berlin Airshow 2012, American Eurocopter announced that Med-Trans Corporation, an industry leading air medical provider, has signed an agreement to purchase up to 16 EC135[®] helicopters. The order includes 10 firm bookings and options for an additional six helicopters. The new EC135s will help Med-Trans sustain its market growth and expansion.

"This selection of the EC135 as the base of its expansion exemplifies Med-Trans' trust and commitment to our aircraft and our company," said Marc Paganini, President and CEO of American Eurocopter. "Med-Trans has been a valued customer for many years and we are delighted to continue our long-standing relationship with it and look forward to supporting its continued growth."

The EC135 has established itself as one of the premier helicopters in the U.S. air medical market. One of the highlights of this was Med-Trans' selection of the EC135 as the platform for many of its life-saving air medical programs in 2007 with the purchase of eight EC135s and eight options. Med-Trans currently has 20 EC135s in its fleet

"We originally selected the EC135 because we wanted a fleet that was not only versatile and reliable, but one that also provided a flexible and adaptable platform that would meet current mission demands and grow with us to meet the needs of our expanding customer base," explained Fred B. Buttrell, President and CEO of Med-Trans Corporation. "With the addition of these new EC135s we will be able to continue to provide economical aircraft solutions that maximize patient care and partner satisfaction throughout our wider service regions."

The EC135 was designed to meet the demands of operators in variety of mission environments. The aircraft provides high performance, extended range, flexibility, and reliability.

"We know that HEMS operators especially appreciate the outstanding maneuverability and cabin size of the EC135. We are happy that this aircraft has become the twin-engine helicopter of choice in the air medical services industry in the United States and other countries", said Wolfgang Schoder, Eurocopter's Executive Vice President, Programs.

Worldwide, there are more than 1000 EC135s in service, and around 50% are in service for emergency medical services. In the U.S., there are over 260 EC135s in service, and over the last ten years, the EC135 has accounted for over 80% of the light twin helicopters delivered to the U.S. air medical industry.

About American Eurocopter

American Eurocopter is the U.S. affiliate of Eurocopter, the largest helicopter manufacturer in the world, and a subsidiary of EADS North America Holdings, the North American operations of EADS, the second largest aerospace and defense company in the world. American Eurocopter is a helicopter manufacturer and markets, sells and supports the broadest range of civil and parapublic helicopters offered by any manufacturer. The product line represents the most cost-effective, technologically-advanced helicopters, ranging from light single to heavy twin, serving all markets and missions. Company headquarters and main facility are in Grand Prairie, TX, with a large manufacturing and production facility in Columbus, MS.

About Eurocopter

Established in 1992, the Franco-German-Spanish Eurocopter Group is a division of EADS, a world leader in aerospace and defense-related services. The Eurocopter Group employs approximately 20,000 people. In 2011, Eurocopter confirmed its position as the world's number one helicopter manufacturer with a turnover of 5.4 billion Euros, orders for 457 new helicopters and a 43 percent market share in the civil and parapublic sectors. Overall, the Group's helicopters account for 33 percent of the worldwide civil and parapublic fleet. Eurocopter's strong international presence is ensured by its subsidiaries and participations in 21 countries. Eurocopter's worldwide network of service centers, training facilities, distributors and certified agents supports some 2,900 customers. There are currently more than 11,300 Eurocopter helicopters in service in 149 countries. Eurocopter offers the most comprehensive civil and military helicopter range in the world and is fully committed to safety as the most important aspect of its business.
