Waterproof 2.4GHz SMB Antenna

The Buccaneer Antenna is a robust and completely waterproof medium gain antenna specifically developed for the 2.4 to 2.5GHz frequency band.

Integrating the antenna with its waterproof connector can reduce the total number of connectors in the RF chain, reducing insertion losses, effectively increasing the total system gain.

Designed to the same style as Bulgin's SMB Buccaneer, the sealed antenna has an integrated SMB connector with an overall diameter of just 19mm and the mating panel connector has a panel fixing hole of 16mm diameter. Rated at IP68, the PX0407 provides complete protection from harsh environments, and all electrical connections are gold plated to ensure system performance and reliability is maintained. The panel connector, PX0414, with an SMB jack, is terminated with RG-174 cable in 0.5m, 1.0m or 1.5m lengths, this provides fast assembly to the panel and only requires termination into the equipment.
