

Press release

Pump hazardous media at flow rates up to 1200 m³/h

In keeping with our goal “Higher output with the same quality and safety”, CP Pumpen AG has launched a new pump size in its established MKP product range of sealless magnetic drive pumps. With this new pump size, it is now possible to transfer hazardous media at higher flow rates using the efficient, rugged and safe magnetic drive pumps from CP.

Zofingen, 22 March 2019 – The Swiss pump manufacturer CP Pumpen AG produces zero leakage magnetic drive pumps for handling difficult media. With immediate availability of this new magnetic drive pump, CP offers its customers additional possibilities with the expected CP quality: The MKP 300-250-315 provides flow rates up to 1200 m³/h with differential heads of up to 50 metres.

With this latest development, CP expands its proven product line of magnetic drive pumps for a wide range of media and processes. CP’s magnetic drive pumps are efficient, rugged and safe. These sealless pumps are ideal for hazardous and aggressive media, since they are completely leak-free. Even media containing solids can be handled by CP’s magnetic drive pumps. This new MKP pump size 300-250-315 provides the same capabilities.

Greater demand, larger pumps

CP Pumpen AG produces magnetic drive pumps for a wide variety of industries around the world. The role of the pump manufacturer has become even more challenging, driven by the demands of today’s applications. Being at the heart of the production process, pump design needs to develop to meet our customer expectations. Combined with our increased production capacities, this new development from CP illustrates its response to the needs of its customers.

The team of experts at CP has demonstrated its commitment to continued innovation in magnetic drive pumps with this new model. These pumps consist of a few rugged components. The intelligent modular system simplifies assembly and lowers costs for spare parts, maintenance and service to a minimum. The pump is available with various options and monitoring capabilities – to meet individual customer needs.

CP Pumpen AG: Cleaner Pumps, Cleaner Planet

With its inherently safe sealless pumps, CP Pumpen AG, a Swiss company steeped in tradition, has been providing leakage-free fluid handling solutions for difficult media for over 70 years. In this way and thanks to continuous optimization of its pumps, CP makes an important contribution to the environment. At its site in Zofingen Switzerland, the company manufactures pumps for a wide variety of industries, including the chemical, pharmaceutical, biotechnology, food and beverage, pulp and paper sectors.
