

Chrosziel's new Widgets

The accessory clamp **DSLr 3310** has been developed for the DSLR handle. There are never enough 1/4" and 3/8" connections to fix accessories when you shoot with

VDSLr cameras. The new clamp slides on the handgrip rod and is fixed with a screw in the desired position. It provides two 3/8" threads, one of them with a 1/4" insert. The clamp also fits on all LightWeight Supports with standard diameter 15 mm and can thus e.g. take an articulating arm to carry the receiver of a remote control. Price for this little widget: 19.- Euro.

The **Adaptor Plate Sachtler 401-400-CDS** allows the use of all LightWeight

Supports on the tripod plate of the new Sachtler Cine DSLR head. The long wedge plate with twist stop directly takes cameras or lenses with tripod thread. With the new adaptor plate, Follow Focus and MatteBox can be used. The plate uses the fixed rear

twist stop of the Sachtler wedge plate and is fixed with the existing 1/4" screw. On

the Chrosziel Support, the adapter is fixed twist-safe with two provided 1/4" screws. The slideable slot-nut in the Chrosziel LWS

bottom allows just as well the use of the Handgrip DSLR, the Chrosziel shoulder

brace Balancer and Shoulder Pad proVideo (with the adapter in the foremost position) without the need to take off the Sachtler wedge plate - change from tripod to shoulder in a second!

With this Adapter Plate, VDSLR and video cameras can also use this Sachtler head.

Price for this bigger widget: 69.- Euro.

All prices RRP without tax, ex works Heimstetten / Munich.
