## heidelpay payment processing now available for Smartstore.NET

Dortmund. Smartstore AG has published the heidelpay Payment Plugin in cooperation with heidelpay. The plugin can be downloaded free of charge from the Smartstore.NET Marketplace. As part of the "Summer Autumn" campaign, new customers can benefit from exclusive advantages at heidelpay.

heidelpay GmbH is a leading BaFin approved payment institute for online payment procedures. Founded in 2003, the company covers the complete range of electronic payment processing services.

### All payment methods

Over 200 payment methods from over 160 countries enable Smartstore.NET shop operators to accept payments from all regions of the world. More than 120 transaction currencies are available through the payment system.

### One solution, all services

The heidelpay payment solution is completely modular and adapts flexibly to the needs of each individual shop operator.

### Secure payment transactions

With over 40 available risk checks, heidelpay provides reliable protection against attempted fraud and payment defaults. Together with the shop operator, experts determine the optimum setting for the Risk Suite.

### Transparent costs

With heidelpay, shop operators can keep a full overview of costs at all times. You only pay for service components that you actually use and need.

### Available payment methods

The following payment methods are available in the heidelpay payment plugin for the online shop system Smartstore.NET

- Credit card
- Direct debit (SEPA /optional with payment security)
- PayPal
- SOFORT
- Prepayment
- iDEAL
- Prezlewyx24
- EPS
- Giropay
- Purchase on account B2C (optional with payment security)

### Features

- Optional registration of payment data by customers
- Check-out pages completely customizable via CSS
- Status updates through push notifications possible
- Administration completely in the shop backend
- Support of subscription commerce
- Easy installation via the Smartstore.NET Marketplace

With the heidelpay plugin Smartstore.NET shop operators can now manage all their customer payments with only one service provider. heidelpay is suitable for more than 200 payment methods.

The plugin is integrated into all processes of the shop software. Therefore the transaction management can be done completely from the backend of the shop. All transactions are clearly visualized in the Smartstore.NET backend. All administrative and debit functions, such as credit notes, follow-up bookings or cancellations, are available here. Integration into the check-out process is also seamless. The forms are directly integrated and can easily be adapted to the layout of the shop via CSS. Push notifications can also be activated for all status updates in order to be informed directly about changes.

In addition, a registration function for many payment methods has been added. This allows end customers to save and reuse their data without having to re-enter it.
