

SPEEDLINK Gravity NX 2.1 Subwoofer System

Weertzen, 2 June 2009 – *SPEEDLINK*[®], one of Europe's leading brands of computer and multimedia accessories, presents a subwoofer system with outstanding multimedia sound and a stunning design with the Gravity NX 2.1. Its powerful subwoofer produces an especially strong bass thanks to its wooden cabinet and bass reflex port, while slightly angled satellites deliver optimum sound dispersion. The bold design stylishly reflects the character of the 2.1 system.

The Gravity NX 2.1's predecessor was awarded the coveted title of 'Test Winner' many times in the past by leading specialist magazines. Its successor builds on this and makes an impressive impact with its completely revised design elements and powerful technology. The stylish black Plexiglas front panel complements the design of the subwoofer perfectly and gives the system a contemporary look, while the orange accent creates a stylish contrast.

Outstanding bass

The wooden cabinet and high quality materials deliver rich, detailed bass, with balanced sound in the treble and mid-ranges. Demanding audiophiles will be pleased to hear that each sound channel can be adjusted individually. In addition, the carefully selected range of materials ensures durability while having a noticeable positive impact on sound quality.

Desktop remote offers the ultimate in convenience

The desktop remote can be used to adjust the volume level of both satellites and the subwoofer; it's even possible to connect headphones and a microphone to it. The headphones' volume level can also be adjusted using the desktop remote. Furthermore it's possible to connect an MP3 player to a PC via the Gravity NX 2.1's desktop remote simply by selecting the computer's Line-In socket instead of the microphone socket. The round desktop remote will be an indispensable accessory on any desktop.

The Gravity NX 2.1 Subwoofer System will be available from the start of June 2009 for the RRP of €69.99.
