## Press Release

### Inexpensive and Versatile – Expansion of DOE Product Range

#### 37 Beam Shapes with One Laser Beam

Now that multiple laser lines, dot matrices, etc. play an even larger role in computer-supported measurement technology, LASER COMPONENTS has expanded its range of DOE products.

These diffractive optical elements are plastic components aimed at low laser power levels to generate patterns. The DOEs can be integrated into the laser module or supplied in a mount which can be attached to the FLEXPOINT® lasers. This also allows other DOEs that are more suited for new measurement applications to be attached to the existing laser modules after the fact. View finders are also now available!

#### Trade Shows

**Vision 2011**, November 08-10, 2011, New Trade Fair Center Stuttgart, D, **Booth 4D13**  
**BiOS 2012**, January 21-22, 2012, The Moscone Center, San Francisco, **South Hall – Booth 8517**  
**Photonics West 2012**, Jan. 24-26, 2012, Moscone Center, San Francisco **South Hall – Booth 517**  
**Analytica 2012**, April, 17-20, 2012, Munich International Trade Fairs, **Booth A2.400A**

#### The Company

LASER COMPONENTS is specialized in the development, manufacture, and sale of components and services for the laser and opto-electronics industries. With sales offices in four different countries, the company has served its customers since 1982. In-house production at six locations in Germany, Canada, and the USA began in 1986 and is meanwhile responsible for about half of its turnover. Currently, the family-run business employs more than 130 people worldwide.
