

Dimetix AG – Company profile

Foundation: Dimetix AG, a dynamic Company was founded by young, experienced entrepreneurs in 2002.

Activities: Dimetix AG develops, produces and markets worldwide state-of-the-art Laser-Distance-Sensors. The application of highly innovative laser technology makes it possible to measure absolute distances, contact less up to 500 meters, with an unchallenged precision of ± 1 mm. Customized solutions are also possible.

Our Power:: Motivated and highly qualified employees, most modern manufacturing- and testing facilities, as well as an efficient service guarantee SWISS QUALITY.

Locations: The headquarters of Dimetix AG is located in Herisau, Canton of Appenzell in Switzerland. Customers in different industries worldwide, take advantage our Laser-Distance-Sensors. Dimetix AG is represented on all continents, in important Industrial States, by foreign distributors.

References: Due to brilliant measuring capacities, the field of applications for our Distance-Sensors are multilateral. Measuring positions of moving objects to be found in high rack storage areas, crane applications, container handling systems and suspended conveyors. Furthermore, coil diameters might be measured, stacking heights and silo level monitored, assembly controls accomplished and geometry of objects and rooms measured – just to name a few possible applications.
