

58M SERIES BRIGHTEN UP YOUR PANEL

New colourful anodised bodys available

ITW Switches offers new features on the 58M series of Vandal Resistant Switches.

A wide range of colour anodised bodies are now available. Red, Blue, Black and Gold are just a selection of colours available.

The 22mm diameter switch is made from either Stainless Steel or Aluminium ensures their rugged strength and is panel sealed to IP67.

With Gold Plated contacts, the 58M series are supplied with 500mm wire leads in Momentary or Maintained action with either no Illumination or Halo Illumination.

Illuminated versions can be supplied with integral 5V, 12V or 24V forward voltage resistors for ease of installation. Standard LED Colours are Green, Red, Blue and White.

The variety of options in this compact package size makes the 58M ideal for many applications: Transportation, Outdoor Controls, Security Products, Food Processing and Medical products.

The new 58M Series are available by Engelking Elektronik GmbH (www.engelking.de) as from now.
