

## EMVCo accredits CETECOM to perform Mobile Phase 2 testing

**Summary:** CETECOM improves its EMVCo type approval testing services with the new accreditation for EMVCo Mobile Phase 2 testing.

**May 17, 2016 / Saarbruecken, Germany** – CETECOM, the premiere wireless test and certification lab, is known for its excellent SmartCard service portfolio. This wide range of services has now been extended as EMVCo issues an additional accreditation for CETECOM.

Already accredited for several EMVCo type approval testing services, CETECOM earned another EMVCo certification, as CETECOM is now able to offer **EMVCo Mobile Phase 2 testing** to its customers.

This accreditation allows CETECOM to provide type approval testing for the diverse payment schemes:

- MasterCard
- American Express
- Visa
- Discover
- JCB
- Chinese Union Pay

Using this program, all payment schemes can be tested in one-step. The type approval testing results, once approved by EMVCo, are recognized by all payment schemes. Dealing with each payment scheme separately is not necessary anymore.

This new accreditation sharpens [CETECOM's SmartCard service portfolio](#), which already offers a wide range of [SmartCard services](#) to our customers.

### About CETECOM

For over twenty years, CETECOM has been renowned as an independent test laboratory for mobile phones and other wireless devices. With over 400 employees and test labs in Europe, North America and Asia, CETECOM offers a unique service portfolio servicing the entire range of cellular and consumer wireless products. CETECOM is a leading test and certification lab for smart cards, RFID and NFC applications.

CETECOM provides testing services, consulting and training for wireless technologies: Cellular, Bluetooth, Wi-Fi, NFC and other systems. The company also performs a wide range of testing in the areas of mobile software applications, OTA, SAR, FCC, EMC, field trials, acoustics, batteries and accessories.
