Pushbutton Switches in Stainless Steel with LED illumination require only 16mm mounting hole

The need for space-saving solutions has inspired the creation of this range of 16mm stainless steel switches available in a number of various styles with and without LED illumination.

A wide range of contact variations are available including latching versions with ratings up to 3A and with life cycles up to 1 million operations.

The excellent finish and pleasant action of these switches lends them to a variety of applications in industrial and commercial environments.

The LED illuminated versions can be delivered in amber, blue, green or red and are available in ring or dot style and the lighting can be offered in a wide choice of input voltages from 12VDC to 250VAC.

An extensive range of variations and special versions (including gold plated housings) are available on request.
